Pathways to a New Environmental Ethic Steven E. Alford,2024-07-25 We live under the threat of humanity s self inflicted extinction While technological approaches to climate mitigation are admirable our ecological crisis results ultimately from an inherited unexamined concept of selfhood and a misconceived view of nature The received idea that our self exists inside our skull engenders an assumption that nature is out there with devastating results This book explores three new ways of thinking about the interrelation of ourselves and nature Merleau Ponty s notion of embodiment the connection between enactivism and affordances and object oriented ontology These approaches to selfhood reorder our moral obligations What are our responsibilities to ourselves our children and nature itself An embodied ethic can transcend cultural biases and offer a new way of confronting climate change To meet environmental challenges we need to change our minds about our minds
