upends the notion of the selfish gene and the theory of sexual selection and develops a compelling and controversial alternative theory called social selection This scientifically rigorous model based challenge to an important tenet of neo Darwinian theory emphasizes cooperation elucidates the factors that contribute to evolutionary success in a gene pool or animal social system and vigorously demonstrates that to identify Darwinism with selfishness and individuality misrepresents the facts of life as we now know them American Duroc-Jersey Record American Duroc-Jersey Association,1918
