Old Yellowstone Views:

Old Yellowstone Views John F. Barber, 1987 **Natural Museums** Kathy S. Mason, 2004-08-31 In 1872 the world's first national park was founded at Yellowstone. Although ideas of nature conservation were not embraced generally by the American public, five more parks were created before the turn of the century. By 1916, the year that the National Park Service was born, the country could boast of fourteen national parks, including such celebrated areas as Yosemite and Sequoia. Kathy Mason demonstrates that Congress, park superintendents, and the American public were forming general, often tacit notions of the parks' purpose before the new bureau was established. Although the Park Service recently has placed some emphasis on protecting samples of North America's ecosystems, the earliest national parks were viewed as natural museums, monuments to national grandeur that would edify visitors. Not only were these early parks to preserve monumental and unique natural attractions, but they also had to be of no use to mining, lumbering, agriculture, and other productive industries. **Natural Museums** examines the notions of park monumentalism, worthlessness, and national significance, as well as the parks' roles as wilderness preserves and recreational centers.

San Francisco Lithographer Robert J. Chandler, 2014-01-29 Grafton Tyler Brown, whose heritage was likely one-eighth African American, finessed his way through San Francisco society by passing for white. Working in an environment hostile to African American achievement, Brown became a successful commercial artist and businessman in the rough and tumble gold rush era and the years after the Civil War. Best known for his bird's-eye cityscapes, he also produced and published maps, charts, and business documents, and he illustrated books, sheet music, advertisements, and labels for cans and other packaging. This biography by a distinguished California historian gives an underappreciated artist and his work the recognition long overdue. Focusing on Grafton Tyler Brown's lithography and his life in nineteenth-century San Francisco, Robert J. Chandler offers a study equally fascinating as a business and cultural history and as an introduction to Brown, the artist. Chandler's contextualization of Brown's career goes beyond the issue of race, showing how Brown survived and flourished as a businessman. Chandler offers unique insight into the growth of printing and publishing in California and the West. He examines the rise of lithography, its commercial and cultural importance, and the competition among lithographic companies. He also analyzes Brown's work and style, comparing it to the products of rival firms. Brown was not respected as a fine artist until after his death. Collectors of western art and Americana now recognize the importance of Californiana, and of Brown's work, some of which depicts Portland and the Pacific Northwest, and they will find Chandler's checklist descriptions and reproductions of Brown's ephemera, including billheads and maps, as uniquely valuable. Chandler's contribution to the cultural and commercial history of California. In an afterword, historian Shirley Ann Wilson Moore discusses the circumstances and significance of passing in nineteenth-century America.
