Preserving London:

Politics and Preservation John Delafons,1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company

The Conservation Movement: A History of Architectural Preservation Miles Glendinning,2013-01-17 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians In many cities across the world particularly in Europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive How has that widely shared belief come about and is its continued general acceptance inevitable Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity The close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant Miles Glendinning s new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely

Conservation of Ruins John Ashurst,2007 Despite growing international awareness of the presence and significance of ruined buildings and archaeological sites these sites continue to be at risk across the globe This book defines and describes these risks which range from neglect to destructive archaeology and even well meaning intervention in the name of tourism

Silos for Preserving British Fodder Crops, Stored in a Green State, by the Sub-editor of 'The Field' Frederick Woodland Toms,1885

Preserving the Past Michael Hunter,1996 An illustrated account of the history of the protection and appreciation of buildings archaeological sites and other relics of the man made past in Britain which features contributions from a group of experts who examine key themes and episodes in the development of historical preservation

Conservation of Historic Buildings Bernard Feilden,2007-06-07 Since its publication in 1982 Sir Bernard Feilden s Conservation of Historic Buildings has become the standard text for architects and others involved in the conservation of historic structures Leading practitioners around the world have praised the book as being the most significant single volume on the subject to be published This third edition revises and updates a classic book including completely new sections on conservation of Modern Movement buildings and non destructive investigation The result of the lifetime s experience of one of the world s leading architectural conservators the book comprehensively surveys the fundamental principles of conservation in their application to historic buildings and provides the basic information needed by architects engineers and surveyors for the solution of problems of architectural conservation in almost every climatic region

of the world This edition is organized into three complementary parts in the first the structure of buildings is dealt with in detail the second focuses attention on the causes of decay and the materials they affect and the third considers the practical role of the architect involved in conservation and rehabilitation As well as being essential reading for architects and others concerned with conservation many lay people with various kinds of responsibility for historic buildings will find this clearly written jargon free work a fruitful source of guidance and information Wood Preserving News ,1925 Upholstery Conservation: Principles and Practice Dinah Eastop,Kathryn Gill,2012-09-10 This well referenced book provides an amply illustrated publication on upholstery conservation which discusses and reviews the issues related to the care interpretation and treatment of upholstered furniture Through many well illustrated case studies the inter disciplinary collaboration fundamental to upholstery conservation and the complex decision making process involved in the treatment of upholstered furniture are made evident The case histories are contributed by leading international practitioners in the field and concern objects and collections in the care of English Heritage the Victoria and Albert Museum the Metropolitan Museum of Art and other internationally renowned institutions Likewise the contributors from both sides of the Atlantic are world renowned specialists and leaders in this area of conservation working for the public and private sectors The case histories illustrated in colour black and white and specially prepared line drawings concern object treatment and documentation the conservation of information the function and the artefact They range from the documentation of eighteenth century removable chair covers and the treatment of a nineteenth century carriage to a twentieth century foam filled chair belonging to a museum
