National and Transnational Memories of the Kindertransport Amy Williams, William Niven, Bill Niven, 2023 The first transnational study of the memory of the Kindertransport and the first to explore how it is represented in museums memorials and commemorations The Kindertransport the rescue of ca 10 000 Jewish children from the Nazi sphere of control and influence before the Second World War has often been framed as a British story This book recognizes that even though most of the Kinder were initially brought to the UK and many stayed it was more than that It therefore compares British memory of the Kindertransport to that of other host nations the US Canada Australia and New Zealand It is the first book to ask how the Kindertransport is remembered both in the countries of origin particularly Germany and in the host nations as well as the first to analyze how it is represented in museums memorials and commemorations Seeing memory of the Kindertransport in the host nations and in Germany as significantly different the study argues that the different national memory discourses around the Nazi persecution of Jews shape the respective countries images of the Kindertransport and

that those images in turn shape the discourses especially in Britain Yet while national memory frameworks remain crucial to how the Kindertransport is remembered the book also documents the increasing significance of transnational memory trends that link the host nations with each other and with the countries from which the children originated
