Drawing Deportation Silvia Rodriguez Vega, 2023-02-14 Illustrates how the children of immigrants use art to grapple with issues of citizenship state violence and belonging Young immigrant children often do not have the words to express how their lives are shaped by issues of immigration legal status and state sanctioned violence Yet they are able to communicate its effects on them using art Based on ten years of work with immigrant children as young as six years old in Arizona and California and featuring an analysis of three hundred drawings theater performances and family interviews Silvia Rodriguez Vega provides accounts of children s challenges with deportation and family separation during the Obama and Trump administrations While much of the literature on immigrant children depicts them as passive when viewed through this lens they appear as agents of their own stories The volume provides key insights into how immigrant children in both states presented creative out of the box powerful solutions to the dilemmas that anti immigrant rhetoric and harsh immigration laws present Through art they demonstrated a righteous indignation against societal violence dehumanization and death as a tool for navigating a racist anti immigrant society When children are the agents of their own stories they can reimagine destructive situations in ways that adults sometimes cannot offering us alternatives and hope for a better future At once devastating and revelatory Drawing Deportation provides a roadmap for how art can provide a safe and necessary space for vulnerable populations to assert their humanity in a world that would rather divest them of it **On Depiction: Selected**

Tourism, Urbanization, and the Evolving Periphery of the European Union Max Holleran, 2019-10-25 This book explores travel, tourism, and urban development at the edges of Europe from the 1970s until the present. It compares tourism spurred urban growth in Spain and Bulgaria, showing how development in Southern Europe after the fall of dictatorships provided a model for integrating post-socialist Europe in the 1990s. It analyzes the economic, cultural, and political dimensions of tourist economies, showing how they aligned with major European Union integration goals and were supported with EU development funds. It also chronicles the social and environmental costs of mass tourism where overdevelopment has despoiled beachfronts and promoted low-paying service jobs, reinforcing regional divisions in Europe between those who host and those who visit. Ultimately, it argues that while mass tourism is touted as a viable economic solution to EU inequality, it can potentially exacerbate disparities between core and peripheral zones, creating new and troubling forms of regional polarization.
