Race Colonialism The City:

Race, Colonialism and the City John Rex, 2007 **Urbanism, Colonialism, and the World-Economy** Anthony King, 2015-03-27 Recent years have witnessed a surge in public awareness concerning the impact of world economic forces on cities In this challenging book the author argues that though the consciousness is new the phenomena themselves are not For the past two centuries at least world economic political and cultural forces have been major factors shaping cities patterns of urbanization and the physical and spatial forms of the built environment Anthony King believes that the historical context of contemporary global restructuring must be recognized if present day urban and regional change is to be properly understood He explores and documents the cultural and spatial links between metropolitan core and colonial periphery and examines the historical foundations of the world urban system He also looks at the social production of building and urban form and demonstrates their potential for understanding economic political social and cultural change on a global scale

Review of Race, colonialism and the city Sydney Kronus, 1975 *Colonial Cities* R.J. Ross, Gerard J. Telkamp, 2012-12-06 by ROBERT ROSS and GERARD J TELKAMP I In a sense cities were superfluous to the purposes of colonists The Europeans who founded empires outside their own continent were primarily concerned with extracting those products which they could not acquire within Europe These goods were largely agricultural and grown most often in a climate not found within Europe Even when as in India before 1800 the major exports were manufactures in general they were still made in the countryside rather than in the great cities It was only on rare occasion when great mineral wealth was discovered that giant metropolises grew up around the site of extraction Since their location was determined by geology not economics they might be in the most inaccessible and inconvenient areas but they too would draw labour off from the agricultural pursuits of the colony as a whole From the point of view of the colonists the cities were therefore in some respects necessary evils as they were parasites on the rural producers competing with the colonists in the process of surplus extraction Nevertheless the colonists could not do without cities The requirements of colonisation demanded many unequivocally urban functions Pre eminent among these was of course the need for a port to allow the export of colonial wares and the import of goods from Europe or from other parts of the non European world in the country trade as it was known around India *The Making and Unmaking of Colonial Cities* Julia C. Obert, 2023-09-15 The Making and Unmaking of Colonial Cities is a comparative study of architectural space in four post colonial capitals Belfast Northern Ireland Windhoek Namibia Bridgetown Barbados and Hanoi Vietnam Each chapter takes up one of these cities outlining its history of building and urban planning under colonial rule and linking that history to its contemporary shape and scope This genealogical information is drawn from primary source documents and archival materials The chapters then look to local literary texts to better understand the lingering impact of colonial building practices on individuals living in post colonial cities today These texts often foreground the difficulty of moving through a city that can never feel comfortably one's own legacies of racial

segregation buildings that disregard indigenous resources and street names that serve as constant reminders of a history of oppression for example can produce feelings of anxiety even of unbelonging for native subjects However the literature also highlights ways in which the subversive wanderings of particular pedestrians taking shortcuts trespassing in forbidden places diverting spaces from their intended uses can contest official topography Bodies can therefore move against the power of a repressive regime at least to some degree even when that power is literally set in stone Obert argues for the significance of these small gestures of reclamation suggesting that we must counterpose the potential flexibility of lived space to the prohibitions of the map in order to more fully understand post colonial power relations

Sustainable Intercultural Urbanism at the Service of the African City of Tomorrow Esoh Elamé,2022-06-03 Most African cities are human settlements that lack the systems needed for effective land use planning In fact the disorganization that prevails has become so complex that the concept of urbanism itself has been called into question This book highlights the need to restore urban planning in African cities through sustainable development and interculturality Furthermore it addresses the balance of power between urban planning and sustainable development and explores the historical and postcolonial aspects of urban planning in African cities A case study focusing on the development of sustainable cities and neighborhoods in the M Zab Valley is also included as well as topics such as urban greening climatic threats and the problem of state agro industrial land transactions which compete with sustainable urban planning Sustainable Intercultural Urbanism at the Service of the African City of Tomorrow is a valuable reference for researchers and practitioners interested in urban issues in African cities These cities in particular sub Saharan cities have long been excluded from any discourse on sustainable cities and urban planning this book places the focus on these cities and acknowledges their varied urban realities The intention is to spark a new debate on sustainable urban planning in African cities based on intercultural sustainable urbanism which is key to thinking about and building ecological intercultural compact intelligent and postcolonial cities

From Empire to Empire Abigail Jacobson,2011-08-04 The history of Jerusalem as traditionally depicted is the quintessential history of conflict and strife of ethnic tension and of incompatible national narratives and visions It is also a history of dramatic changes and moments one of the most radical ones being the replacement of the Ottoman regime with British rule in December 1917 From Empire to Empire challenges these two major dichotomies ethnic and temporal which shaped the history of Jerusalem and its inhabitants It links the experiences of two ethnic communities living in Palestine Jews and Arabs as well as bridging two historical periods the Ottoman and British administrations Drawing upon a variety of sources Jacobson demonstrates how political and social alliances are dynamic context dependent and purpose driven She also highlights the critical role of foreign intervention governmental and nongovernmental in forming local political alliances and in shaping the political reality of Palestine during the crisis of World War I and the transition between regimes From Empire to Empire offers a vital new perspective on the way World War I has been traditionally studied in the Palestinian context It also examines the effects

of war on the socioeconomic sphere of a mixed city in crisis and looks into the ways the war as well as Ottoman policies and administrators affected the ways people perceived the Ottoman Empire and their location within it From Empire to Empire illuminates the complex and delicate relations between ethnic and national groups and offers a different lens through which the history of Jerusalem can be seen it proposes not only a story of conflict but also of intercommunal contacts and cooperation
