Race Science Politics:

Race: Science and Politics Ruth Benedict, 1959 **Race** Ruth Benedict, Margaret Mead, 2019-10-15 In science race can be a useful concept for specific limited purposes When race as a way of classifying people is drafted into the service of politics religion or any belief system then danger follows That is the focus of this classic repudiation of racism which is as readable and timely now as when it first appeared *Race Science and Politics* was first published in 1940 in response to the global rise of fascism and its pseudoscientific rationales for marginalizing and even exterminating inferior people Writing for a general audience Ruth Benedict ranges across the history of Western thought and research on race to illuminate rifts between the facts of race and the claims of racism Rather than take issue only with the Nazis and their allies Benedict set out to show that all racist beliefs are objectively groundless and that is the key to the book's ongoing relevance The book's bonus content includes *The Races of Mankind* a pamphlet length distillation of the book with its own controversial role in dismantling racist theory This edition also includes a new foreword by Judith Schachter An anthropologist historian and Benedict biographer Schachter discusses the book's importance for current readers Also included is a foreword by anthropologist Margaret Mead from 1958 a time when colonial ties around the world were unravelling and civil rights unrest was a daily occurrence in the United States

The Science and Politics of Racial Research William H. Tucker, 1994 Unlike other critiques of the scientific literature on racial difference *The Science and Politics of Racial Research* argues that there has been no scientific purpose or value to the study of innate differences in ability between groups William Tucker shows how for more than a century scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences Tucker structures his work chronologically with each chapter describing how research on genetic difference was used in a particular era to support a particular political agenda He begins with the use of science to support slavery in the mid nineteenth century and ends with the effects of Jensenism in the 1970s Highlights include one chapter describing a little known but concerted attempt by a group of scientists to overturn the *Brown v Board of Education* decision on the basis of expert testimony about racial differences and another that presents a review of the eugenics movement in the twentieth century The author also considers how to balance the rights and responsibilities of scientists concluding that one generally neglected method is to strengthen the rights of research subjects

Decoding Racial Ideology in Genomics Johnny E. Williams, 2016-05-27 Although the human genome exists apart from society knowledge about it is produced through socially created language and interactions As such genomicists thinking is informed by their inability to escape the wake of the race concept This book investigates how racism makes genomics and how genomics makes racism and race and the consequences of these constructions Specifically Williams explores how racial ideology works in genomics The simple assumption that frames the book is that race as an ideology justifying a system of oppression is persistently recreated as a practical and familiar way to understand biological

reality This book reveals that genomicists preoccupation with race regardless of good or ill intent contributes to its perception as a category of differences that is scientifically rigorous

The Routledge Handbook of Science and Empire Andrew Goss,2021-07-05 The Routledge Handbook of Science and Empire introduces readers to important new research in the field of science and empire This compilation of inquiry into the inextricably intertwined history of science and empire reframes the field showing that one could not have grown without the other The volume expands the history of science through careful attention to connections exchanges and networks beyond the scientific institutions of Europe and the United States These 27 original essays by established scholars and new talent examine scientific and imperial disciplines networks of science scientific practice within empires and decolonised science The chapters cover a wide range of disciplines from anthropology and psychiatry to biology and geology There is global coverage with essays about China Southeast Asia the Pacific Australia and New Zealand India the Middle East Russia the Arctic and North and South America Specialised essays cover Jesuit science natural history collecting energy systems and science in UNESCO With authoritative chapters by leading scholars this is a guiding resource for all scholars of empire and science Free of jargon and with clearly written essays the handbook is a valuable path to further inquiry for any student of the history of science and empire

Cyclopædia of Political Science, Political Economy, and of the Political History of the United States John Joseph Lalor,1884 *Race* Ruth Benedict,Gene Weltfish,1947 **Blood Sugar** Anthony Ryan Hatch,2016-04-10 Why do African Americans have exceptionally high rates of hypertension diabetes and obesity Is it their genes Their disease prone culture Their poor diets Such racist explanations for racial inequalities in metabolic health have circulated in medical journals for decades Blood Sugar analyzes and challenges the ways in which metabolic syndrome has become a major biomedical category that medical researchers have created to better understand the risks high blood pressure blood sugar body fat and cholesterol pose to people An estimated sixty million Americans are well on the way to being diagnosed with it many of them belonging to people of color Anthony Ryan Hatch argues that the syndrome represents another very real crisis and that its advent signals a new form of colorblind scientific racism a repackaging of race within biomedical and genomic research Examining the cultural discussions and scientific practices that target human metabolism of prescription drugs and sugar by African Americans he reveals how medical researchers who use metabolic syndrome to address racial inequalities in health have in effect reconstructed race as a fixed biological genetic feature of bodies without incorporating social and economic inequalities into the equation And just as the causes of metabolic syndrome are framed in racial terms so are potential drug treatments and nutritional health interventions The first sustained social and political inquiry of metabolic syndrome this provocative and timely book is a crucial contribution to the emerging literature on race and medicine It will engage those who seek to understand how unjust power relations shape population health inequalities and the production of medical knowledge and biotechnologies

Cyclopædia of Political Science, Political Economy, and of the Political History of

the United States, by the Best American and European Writers John Joseph Lalor,1899 Cyclopaedia of Political Science, Political Economy, and of the Political History of the United States John Joseph Lalor,1882 *Brown Skins, White Coats* Projit Bihari Mukharji,2023-02-17 A unique narrative structure brings the history of race science in mid twentieth century India to vivid life There has been a recent explosion in studies of race science in the twentieth and twenty first centuries but most have focused either on Europe or on North America and Australia In this stirring history Projit Bihari Mukharji illustrates how India appropriated and repurposed race science to its own ends and argues that these appropriations need to be understood within the national and regional contexts of postcolonial nation making not merely as footnotes to a Western history of normal science The book comprises seven factual chapters operating at distinct levels conceptual practical and cosmological and eight fictive interchapters a series of epistolary exchanges between the Bengali author Hemendrakumar Ray 1888 1963 and the protagonist of his dystopian science fiction novel about race race science racial improvement and dehumanization In this way Mukharji fills out the historical moment in which the factual narrative unfolded vividly revealing its moral affective political and intellectual fissures *The Vaccine Race* Meredith Wadman,2017 The rubella vaccine and others made with fetal cells have protected more than 150 million people in the United States the vast majority of them preschoolers The new cells and the method of making them also led to vaccines that have protected billions of people around the world from polio rabies chicken pox measles hepatitis A shingles and adenovirus Meredith Wadman s book covers not only the science of this advancement but also the political roadblocks that nearly stopped the scientists Provided by publisher Cyclopædia of Political Science, Political Economy, and of the Political History of the United States: East India Company-Nullification John Joseph Lalor,1883 *The Saturday Review of Politics, Literature, Science and Art* ,1866 **Refashioning Race** Alka Vaid Menon,2023-05-16 Cosmetic surgery was once associated with a one size fits all approach modifying patients to conform to a single standard of beauty As this surgery has become more accessible worldwide changing beauty trends have led to a proliferation of beauty standards for members of different racial groups Alka V Menon enters the world of cosmetic surgeons journeying from a sprawling convention center in Kyoto to boutique clinics in the multicultural countries of the United States and Malaysia She shows how surgeons generate and apply knowledge using racial categories and how this process is affected by transnational clinical and economic exchanges Surgeons not only measure and organize but also elaborate upon racial differences in a globalized field of medicine Focusing on the role of cosmetic surgeons as gatekeepers and producers of desired appearances *Refashioning Race* argues that cosmetic surgeons literally reshape race both on patients bodies and at the broader level of culture **Political Affairs** ,1930 **The Johns Hopkins University Studies in Historical and Political Science** ,1890 **Finding List of the Social Sciences, Political Science, Law, and Education** Virginia State Library,1910 The Journal of Race Development ,1919 Hoffek V. Ryan ,2001
