To this end, Applied Memory consists of 17 chapters that explore the influences of generation, irrelevant speech, verbal overshadowing, isolation, part set cuing, reminiscence, hyperemnesia, placebos, mental state, metamemory, knowledge, flashbulb events, and traumatic events on memory in everyday settings, as well as applications of source memory, social memory, involuntary autobiographical memory, dream memory, and strategic memory regulation. The volume is designed as a resource for basic and applied memory researchers and as a supplementary text in graduate or upper-level undergraduate courses in cognitive psychology, human memory, or applied psychology.
