Remembering War J. M. Winter, 2006-01-01 This is a masterful volume on remembrance and war in the twentieth century Jay Winter locates the fascination with the subject of memory within a long term trajectory that focuses on the Great War Images languages and practices that appeared during and after the two world wars focused on the need to acknowledge the victims of war and shaped the ways in which future conflicts were imagined and remembered At the core of the memory boom is an array of collective meditations on war and the victims of war Winter says The book begins by tracing the origins of contemporary interest in memory then describes practices of remembrance that have linked history and memory particularly in the first half of the twentieth century The author also considers theaters of memory film television museums and war crimes trials in which the past is seen through public representations of memories The book concludes with reflections on the significance of these practices for the cultural history of the twentieth century as a whole

Commemorating War Graham Dawson, T. G. Ashplant, Michael Roper, 2000 War memory and commemoration have had increasingly high profiles in public and academic debates in recent years This volume examines some of the social changes that have led to this development among them the passing of the two world wars from survivor into cultural memory Focusing on the politics of war memory and commemoration the book illuminates the struggle to install particular memories at the center of a cultural world and offers an extensive argument about how the politics of commemoration practices should be understood Commemorating War analyzes a range of forms of remembrance from public commemorations orchestrated by nation states to personal testimonies of war survivors and from cultural memories of war represented in films plays and novels to investigations of wartime atrocities in courts of human rights It presents a wide range of international case studies encompassing lesser known national histories and wars beyond the well trodden terrain of Vietnam and the two world wars in Europe Emerging from this book is an important critique of both state centered approaches to war memory and those that regard commemoration primarily as a human response to loss and grief Offering a wealth of empirical research material this book will be important for cultural and oral historians sociologists researchers in international relations and human rights and anybody with an interest in the cultural construction of memory in contemporary society Provided by publisher The

**Memory, War and Trauma** Nigel C. Hunt,2010-05-13 Many millions of people are affected by the trauma of war Psychologists have a good understanding of how experiences of war impact on memory but the significance of external environmental influences is often disregarded Memory War and Trauma focuses on our understanding of the psychosocial impact of war in its broadest sense Nigel C Hunt argues that in order to understand war trauma it is critical to develop an understanding not only of the individual perspective but also of how societal and cultural factors impact on the outcome of an individual s experience This is a compelling book which helps to demonstrate why some people suffer from post traumatic stress while other people don t and how narrative understanding is important to the healing process Its multidisciplinary perspective will enable a deeper understanding of both individual traumatic stress and the structures of memory

and mass displacement in Ukraine triggered intensive reevaluations of the past and collective identities. The contributors to this volume examine how memory is mobilised and how cultural collective and individual memories are being reshaped to deal with the ruptures and threats posed by the war. They offer a multi-scalar perspective on the transformational effects of war and displacement on Ukrainian society in various contexts: local, regional, national, and global, and deal with shifts of memory and symbolic representations, experiences of dislocation, shifts in the linguistic and religious landscapes, gender roles, and repercussions of war on minority groups.

War Memory and Commemoration Brad West, 2017. In a period characterised by an unprecedented cultural engagement with the past, individuals, groups, and nations are debating and experimenting with commemoration in order to find culturally relevant ways of remembering warfare, genocide, and terrorism. This book examines such remembrances and the political consequences of these rites. In particular, the volume focuses on the ways in which recent social and technological forces, including digital archiving, transnational flows of historical knowledge, shifts in academic practice, changes in commemorative forms, and consumerist engagements with history, affect the shaping of new collective memories and our understanding of the social world. Presenting studies of commemorative practices from Africa, Asia, Australia, Europe, and the Middle East, War Memory and Commemoration illustrates the power of new commemorative forms to shape the world and highlights the ways in which social actors use them in promoting a range of understandings of the past. The volume will appeal to scholars of sociology, history, cultural studies, and journalism with an interest in commemoration, heritage, and/or collective memory.

Memories and Representations of War, 2009-01-01. The contributors to the present volume approach World War I and World War II as complex and intertwined crossroads leading to the definition of the new European and world reality and deeply pervading the making of the twentieth century. These scholars belong to different yet complementary areas of research: history, literature, cinema, art history; they come from various national realities and discuss questions related to Italy, Britain, Germany, Poland, Spain, at times introducing a comparison between European and North American memories of the two World War experiences. These scholars are all guided by the same principle: to encourage the establishment of an interdisciplinary and transnational dialogue in order to work out new approaches capable of integrating and acknowledging different or even opposing ways to perceive and interpret the same historical phenomenon. While assessing the way the memories of the two World Wars have been readjusted each time in relation to the evolving international historical setting and through various mediators of memory—cinema, literature, art, and monuments—the various essays contribute to unveil a cultural panorama inhabited by contrasting memories and by divided memories, not to emphasise divisions but to acknowledge the ethical need for a truly shared act of reconciliation.

Memory, Narrative and the Great War David Taylor, 2013. This is a detailed study of an important figure whose differing perceptions of the Great War throw valuable light on the way in which war is remembered and narrated.

Postnational Memory, Peace and War Nigel Young, 2019-11-26. This book examines the phenomenon of modern memory as a reaction to total war, an

aspiration to truth seeking provoked by the independent forces of modern war and collective violence which is transnational or postnational in character Using examples from prose and poetry film and theatre painting and photography and music and the popular arts the author traces a narrative path through the events of the twentieth century defining the tradition of modern memory in terms of its essentially anti militaristic anti war character as expressed in the manner in which it represents recalled violence and atrocity Through a series of thematic discussions of two world wars the Shoah uricide and nuclear weapons Postnational Memory explores the formation of transnational memory drawing on examples from industrialized societies with a focus on memory of real events and their reproduction in literature and the arts often including personal recollections that link the self to the represented past As such by asking how the concept of modern memory is constructed through the victims of war and genocide the book constitutes an alternative to national memories and hegemonic militarist or ethnocentric histories Surveying the emergence of new transnational forms of remembering the past it will appeal to students and scholars of sociology memory studies and peace studies as well as those working in disciplines such as modern and international history cultural studies and military studies
