

Introduction to Memory Impairment

- Memory problems are common after brain injury or illness.
- Memory isn't just one thing—different types and brain areas are involved.
- This chapter covers:
 - Main memory theories.
 - How memory is tested.
 - Ways to help people with memory problems (rehab).

Types of Memory:

1. Working Memory (Short-term)

- Holds info for a few seconds.
- Has 3 parts (Baddeley, 1986):
 - **Phonological loop:** Stores spoken words (like repeating a phone number).
 - **Visuospatial sketchpad:** Stores pictures and visual info.
 - **Central executive:** Manages attention and controls the other two.

2. Long-term Memory

- Stores facts and events for minutes, years, or even forever.
-

Different Types of Long-Term Memory

By Material Type:

- **Verbal** (words, language) - left brain.
- **Non-verbal** (images, faces) - right brain.

By Conscious Access:

- **Explicit (Declarative):** You remember on purpose (facts, experiences).
- **Implicit (Non-declarative):** Memory without thinking (skills, habits, priming).

By Information Type:

- **Semantic Memory:** Facts, meanings, general knowledge (e.g., capital of a country).
 - **Episodic Memory:** Personal events (e.g., your last birthday).
-

□ Recall vs Recognition

- **Recall:** Remembering without a clue (e.g., answering a test question).
 - **Recognition:** Recognizing when you see it (e.g., seeing a familiar face).
-

□ Prospective Memory (Remembering Future Tasks)

- Like remembering to take medicine or send a birthday card.
 - Needs planning, attention, and memory.
 - Called "realizing delayed intentions" (Ellis, 1996).
-

□ Brain Areas and Memory

Important Brain Parts:

- **Hippocampus** (in temporal lobe): Key for remembering events.
 - **Temporal lobes:** Help store long-term memories.
 - **Frontal lobes:** Help with organizing, planning, and retrieving memories.
 - **Left frontal lobe:** Helps encode (store) new info.
 - **Right frontal lobe:** Helps retrieve info.
-

□ Memory Models

- Memory is a team effort across brain areas.
 - **Damasio & Mesulam's Models:**
 - Brain is built in layers:
 - Basic senses → recognize objects → link objects into events (hippocampus).
 - Memory = Re-activating brain connections made during learning.

An Introduction to the Study of Hypnotism: Experimental and Therapeutic Hugh Edward Wingfield, 1920

Pediatric Sedation Outside of the Operating Room Keira P. Mason, 2014-10-11. This is a major revision, updating and expansion of the leading single source volume on pediatric sedation outside of the operating room. Edited and written by an international roster of outstanding experts, it is the only book aimed at the broad range of specialists who deliver pediatric sedation in the non-OR setting. The Second Edition features a significant expansion of contributions from international leaders and individual new chapters on pre-sedation assessment, sedatives, short and long-term effects on neurocognition, non-pharmacologic distractions, Michael Jackson's death, and medical ethics, the role of simulation in safety and training, and palliative sedation in terminally ill children. The specialty-specific chapters continue to be geared toward all sedation providers, regardless of where they practice, and patient safety is again emphasized. Fundamental chapters provide in-depth reviews of topics which include, among others, physiology and pharmacology. The book presents the latest guidelines across the specialties, both in the United States and abroad, and noteworthy ongoing research endeavors. From reviews of the First Edition: This meritorious volume is a splendid collection of materials from highly experienced authors. I will make extensive use of this reference as the academic medical center in which I work continues to build sedation practices and assess credentialing/privileging aspects for professionals of all fields. Joseph R. Tobin, MD, in *Journal of the American Medical Association*. Brings together sedation practice from a broad range of specialties into one well-written pediatric text. I will certainly be using this book as a reference text in the future. *Pediatric Anesthesia*. The first text directed at all specialists that treat children who require some sedation also recognizes the contributions to pediatric sedation of many international societies and governmental organizations. It should be on the shelves of all office-based practices. *Journal of Neurosurgical Anesthesiology*. With the ever-increasing opportunities to perform various investigations and therapeutic procedures combined with increasing demands and expectations from children and their parents, the need and demand for safe and effective sedation of paediatric patients outside the operating room is increasing. Against this background, the second edition of *Pediatric Sedation Outside the Operating Room* is a very timely addition to the anaesthesia literature. *British Journal of Anaesthesia*.

Intersections of Law and Memory Mirosław Michał Sadowski, 2024-03-12. This book elaborates a new framework for considering and understanding the relationship between law and memory. How can law influence collective memory? What are the mechanisms law employs to influence social perceptions of the past? And how successful is law in its attempts to rewrite narratives about the past? As the field of

memory studies has grown this book takes a step back from established transitional justice narratives returning to the core sociological philosophical and legal theoretical issues that underpin this field The book then goes on to propose a new approach to the relationship between law and collective memory based on a conception of legal institutions of memory It then elaborates the functioning of such institutions through a range of examples taken from Japan Iraq Brazil Portugal Rwanda and Poland that move from the work of international tribunals and truth commissions to more explicit memory legislation The book concludes with a general assessment of the contemporary intersections of law and memory and their legal institutionalisation This book will be of interest to scholars with relevant interests in the sociology of law legal theory and international law as well as in sociology and politics
