Rumney,2013-04-18 South America is an area of fascination and study for geographers and other scholars from around the world and its land and people have played important roles in the discovery and distribution of civilizations resources and nations for millennia The region has long stimulated a large amount of research across the many subdisciplines of geography and Thomas A Rumney collects organizes and presents as many scholarly publications as possible in *The Geography of South America A Scholarly Guide and Bibliography* Every South American nation is included Argentina Bolivia Brazil Chile Colombia Ecuador French Guiana Guyana Paraguay Peru Surinam Uruguay and Venezuela Beginning with an overview of the region as a whole successive chapters one per nation are divided by specific subdisciplines of geography cultural social economic historical physical and environmental political and urban Each section is then divided by document type atlases books book chapters articles from scholarly journals master s theses and doctoral dissertations Although the majority of entries focus on English language works selected entries written in Spanish French German and other languages are also included with the entry titles translated into English and noted accordingly Mediterranean Type Ecosystems Francesco di Castri,Harold A. Mooney,2012-12-06 No other disjunct pieces

of land present such striking similarities as the widely separated regions with a Mediterranean type of climate that is the territories fringing the Mediterranean Sea California Central Chile and the southernmost strips of South Africa and Australia Similarities are not confined to climatic trends but are also reflected in the physiognomy of the vegetation in land use patterns and frequently in the general appearance of the landscape The very close similarities in agricultural practices and sometimes also in rural settlements are dependent on the climatic and edaphic analogies as well as on a certain commonality in cultural history This is certainly true for the Mediterranean Sea basin which in many ways represents a sort of ecological cultural unit this is also valid for California and Chile which were both settled by Spaniards and which showed periods of vigorous commercial and cultural interchanges as during the California gold rush One other general feature is the massive interchange of cultivated and weed species of plants that has occurred between the five areas of the world that have a Mediterranean type climate with the Mediterranean basin region itself as a major source In spite of their limited territorial extension probably no other parts of the world have played a more fundamental role in the history of mankind Phoenician Etruscan Hellenic Jewish Roman Christian and Arab civilizations among others have shaped many of man's present attitudes including his position and perception vis a vis nature
