Python Programming John M. Zelle, 2004 This book is suitable for use in a university level first course in computing CS1 as well as the increasingly popular course known as CS0 It is difficult for many students to master basic concepts in computer science and programming A large portion of the confusion can be blamed on the complexity of the tools and materials that are traditionally used to teach CS1 and CS2 This textbook was written with a single overarching goal to present the core concepts of computer science as simply as possible without being simplistic

History of Computer Graphics Dan Ryan, 2011-04-14 This book reflects the many changes that computer graphics technology has undergone in my working life time I graduated from a teachers college in 1963 There was not a computer of any kind on campus imagine my shock when my very first college employer Omaha University required me to know something about an IBM 1620 and a key punch machine The first part of this book is an account of that experience at Omaha University and later the Nebraska of Nebraska at Omaha When I moved to Clemson University in 1976 they had a computer and a large Calcomp Plotter but nothing else in the way of computer graphics hardware or software So except for a few short sections in chapter one this history begins with the events of 1963 and proceeds to document what happened to computer graphics for engineering design and manufacturing as practiced by an engineer or technician at Clemson University The next section of the book contains my experiences as a self employed consultant 1993 present my consulting started in 1984 after I completed a PhD in Data Systems Engineering In 1993 I left full time teaching and became Professor Emeritus at Clemson University I wanted to start my own consulting company DLR Associates Oddly enough most of my first consulting in computer graphics took place in the Omaha and Pennsylvania areas not South Carolina My contacts came from my paper presentations at various ASEE meetings and the annual national distance learning conferences held at the University of Maine I took a year off to accept a Fulbright Scholarship Nomination from the University of Roorkee India I was listed as an international member in the Who's Who Directory of the computer graphics industry In a nut shell that is who I am Why then did I decide to write this book
