Rule Of Reason The Philosophy Of C S Peirce:

The Rule of Reason Jacqueline Brunning, Paul Forster, 1997-01-01 While Peirce scholarship has advanced considerably since its earliest days many controversies of interpretation persist and several of the more obscure aspects of his work remain poorly understood

Dewey's Logical Theory F. Thomas Burke, D. Micah Hester, Robert B. Talisse, 2002 Despite the resurgence of interest in the philosophy of John Dewey his work on logical theory has received relatively little attention Ironically Dewey's logic was his first and last love The essays in this collection pay tribute to that love by addressing Dewey's philosophy of logic from his work at the beginning of the twentieth century to the culmination of his logical thought in the 1938 volume *Logic The Theory of Inquiry* All the essays are original to this volume and are written by leading Dewey scholars Ranging from discussions of propositional theory to logic's social and ethical implications these essays clarify often misunderstood or misrepresented aspects of Dewey's work while emphasizing the seminal role of logic to Dewey's philosophical endeavors This collection breaks new ground in its relevance to contemporary philosophy of logic and epistemology and pays special attention to applications in ethics and moral philosophy

Phenomenology on Kant, German Idealism, Hermeneutics and Logic O.K. Wiegand, Robert J. Dostal, Lester Embree, J.J. Kockelmans, J.N. Mohanty, 2013-06-29 Joseph 1 Kockelmans Pennsylvania State University In July of 1999 Prof Dr Thomas M Seebohm turned 65 years old and thus entered mandatory retirement His friends colleagues and former students thought that it would be fitting to celebrate the event of his retirement with a volume of essays in his honor in order to render homage to a great human being an outstanding and dedicated teacher a highly regarded philosopher and scholar but above all a dear friend and colleague When the editors thought about a unifying theme for the anthology they finally settled on the research interests of Professor Seebohm in their view the vast domain of his competence and interests would leave all participants the freedom to select a topic of their own choice that would nonetheless lie within this large realm as well as within the area of their own research interests Professor Seebohm's research interests encompass work in Phenomenology Hermeneutics German Idealism Kant in particular History of Philosophy Philosophy of the formal sciences of Logic in particular Philosophy of History Methodology and Philosophy of the Human Sciences including Psychology and Sociology History of 19th Century British Empiricism Mill American Pragmatism Analytic Philosophy Philosophy of Law and Practical Philosophy the development of the history of philosophy in Eastern Europe especially in the Middle Ages but also in the nineteenth century

Outline of a New Liberalism Nelson W. Keith, 2015-07-29 This book is revolutionary in intent and is in many ways quite an uncommon work It is iconoclastic as it goes about dislodging roots It attempts to release the stigmatized Other from entrapment by rationalism and modern liberalism The stigmatized Other are legendarily marginalized from congenial social relations with mainstream society They include peoples of color women gays and lesbians among others Entrapment through misrecognition is captured via marked contrasts existing between two major liberal configurations modern liberalism and

pragmatism Accordingly the book is tasked with overcoming the systemic constraints placed upon the stigmatized Other to conform when such a demand runs disastrously counter to their inherently irrefragable self definition Conformity is reductionist beholden to dyadic forms of thinking which impose a singular mathematically derived God s Eye View upon reality The difficulty here is that the imposed criteria for giving meaning value and purpose to human life have no place for what the stigmatized Other adopts On the other hand pragmatism of a particular stripe establishes a naturalistic instead of the mathematical basis for our understanding of human life Naturalism counsels that human beings should situate themselves directly in the midst of what constitutes their sense of life with experience providing the bases for all the related determinations Experience draws upon conditions of flux and uncertainty as the basis of human life To adhere to the God s Eye View is to make human beings into desiccated calculating machines This book is located in the heart of this tension Programmatically it deconstructs the rationalism modern liberalism combine and constructs its replacement in pragmatism complemented by phronesis as carriers of this alternative mode of thought Consequential change emerges a modern liberal world of fixity in social relations mathematically derived is displaced by one characterized by intersubjective relations where lived experience forms its scientific and philosophical bases The Ancients figure prominently in this book as it is shaped around the central idea that the emancipation of the stigmatized Other is occurring in the context of perhaps the first engagement between the Platonic and the Protagorean Sophistic confrontation which lies at the heart of early Greek thought
