HQ,2019-07-16 If you've never known what a wildebeest is you'll find out now in this latest Where Is title about the Serengeti. Each year over 1.5 million wildebeest make a harrowing journey more than one thousand miles between Tanzania and Kenya. They are in search of new land to graze. Even if these creatures avoid vicious attacks from lions and crocodiles they could still fall prey to thirst, hunger, and exhaustion. This book not only follows the exciting Migration but also tells about the other creatures and peoples that co-exist along these beautiful landscapes of the Serengeti. [The Epic Trickster in American Literature](#) Gregory E. Rutledge,2013-04-26 Just as Africa and the West have traditionally fit into binaries of Darkness/Enlightenment/Savage/Modern/Ugly/Beautiful and Ritual/Art among others much of Western cultural production rests upon the archetypal binary of Trickster/Epic with trickster aesthetics and commensurate cultural forms characterizing Africa. Challenging this binary and the exceptionalism that underlies anti-hegemonic efforts even today this book begins with the scholarly foundations that mapped out African trickster continuities in the United States and excavated the aesthetics of traditional African epic performances. Rutledge locates trickster-like capacities within the epic hero archetype, the epic/trickster paradigm, and constructs an Homeric Diaspora which is to say that the modern Homeric performance foundation lies at an absolute time and distance away from the ancient storytelling performance needed to understand the cautionary aesthetic inseparable from epic potential. As traditional epic performances demonstrate unchecked epic/trickster dynamism anticipates not only brutal imperialism and creative diversity but the greatest threat to everyone: an eco-apocalypse. Relying upon the preeminent scholarship on African American trickster heroes, traditional African heroic performances, and cultural studies approaches to Greco-Roman epics, Rutledge traces the epic/trickster aesthetic through three seminal African American novels keenly attuned to the American Homeric Diaspora: Charles Chesnut's *The Marrow of Tradition*, Richard Wright's *Native Son*, and Toni Morrison's *Beloved*. **The Nature of German Imperialism** Bernhard Gissibl,2016-07-01 Today the East African state of Tanzania is renowned for wildlife preserves such as the Serengeti National Park, the Ngorongoro Conservation Area, and the Selous Game Reserve. Yet few know that most of these initiatives emerged from decades of German colonial rule. This book gives the first full account of Tanzanian wildlife conservation up until World War I, focusing upon elephant hunting and the ivory trade as vital factors in a shift from exploitation to preservation that increasingly excluded indigenous Africans. Analyzing the formative interactions between colonial governance and the natural world, *The Nature of German Imperialism* situates East African wildlife policies within the global emergence of conservationist sensibilities around 1900. **A History of the Meynell Hounds and Country - 1780 to 1901** J. L. Randall,2017-09-15 First published in 1901, this is the second volume of a fascinating history of the Meynell Hounds, one of the most respected and prestigious hunting packs in the United Kingdom. Including a new introduction to the foxhound, this text has been republished here for its historical and cultural significance. Including a brand new introduction to the Foxhound. **African Paleoecology and Human Evolution** Sally C. Reynolds, René Bobe,2022-06-09 Humans evolved in the dynamic

landscapes of Africa under conditions of pronounced climatic geological and environmental change during the past 7 million years This book brings together detailed records of the paleontological and archaeological sites in Africa that provide the basic evidence for understanding the environments in which we evolved Chapters cover specific sites with comprehensive accounts of their geology paleontology paleobotany and their ecological significance for our evolution Other chapters provide important regional syntheses of past ecological conditions This book is unique in merging a broad geographic scope all of Africa and deep time framework the past 7 million years in discussing the geological context and paleontological records of our evolution and that of organisms that evolved alongside our ancestors It will offer important insights to anyone interested in human evolution including researchers and graduate students in paleontology archaeology anthropology and geology
