## **Reflexive Modernization:**

*Reflexive Modernization* Ulrich Beck, Anthony Giddens, Scott Lash, 1994 Three prominent social thinkers discuss how modern society is undercutting its formations of class stratum occupations sex roles the nuclear family and more Reflexive modernization or the way one kind of modernization undercuts and changes another has wide ranging implications for contemporary social and cultural theory as this provocative book demonstrates *Modernization Science* Chuanqi He, 2012-02-17 Depending on their national level of income development and modernization all countries in the world can be generally categorized as either advanced or developing Studies on why advanced countries continue to develop how they maintain their level of development and how developing countries enter into the advanced club fall into the field of modernization science which is an emerging interdisciplinary science This monograph the first English book available on modernization science interprets its concepts methodologies general theories first and second modernization six level specific six field specific and three sector specific modernizations modernization policy and evaluation and the principles and methods of national development since the 18th century It provides clear systematic up to date information on this new discipline with more than 173 figures and 265 tables and covers 131 countries and 97% of the global population A comprehensive outlook on world modernization is presented from a Chinese perspective **Environment and Global Modernity** Gert Spaargaren, Arthur P J Mol, Frederick H Buttel, 2000-06-02 This accomplished book argues that we can only make sense of environmental issues if we consider them as part of a more encompassing process of social transformation It asks whether there is an emerging consensus between social scientists on the central issues in the debate on environmental change and if concerns about the environment constitute a major prop to the process of globalization The book provides a thorough discussion of the central themes in environmental sociology identifying two traditions ecological modernization theory and risk society theory **Risk in the Modern Age** NA NA, 2019-06-12 Environmental decision making in recent decades has become increasingly dependent on scientific expertise Grounded in universal principles of knowledge these expert evaluations often depart from the assessments of ordinary members of the public Whether the issue is nuclear power genetic testing food safety or biodiversity conservation lay people are increasingly charging experts with being ignorant of local contextual considerations Scientists as well as many policy makers in turn contend that the public is hopelessly irrational in gauging environmental risks A growing group of social theorists has begun to take a keen interest in these disputes because risk captures central themes of late modernity Increasing individualization emerging new social movements and declining public trust in key institutions are notions that loom large in these debates Highlighting both theoretical and empirical perspectives this volume brings together a distinguished group of environmental sociologists who critique and extend current thinking on what it means to live in a risk society *Globalization: The Key Concepts* Annabelle Mooney, Betsy Evans, 2007-03-12 Viewed as a destructive force or an inevitability of modern society globalization is the focus

of a multitude of disciplines A clear understanding of its processes and terminology is imperative for anyone engaging with this ubiquitous topic Globalization the Key Concepts offers a comprehensive guide to this cross disciplinary subject and covers concepts such as homogenization neo Liberalism risk knowledge society time space compression reflexivity With extensive cross referencing and suggestions for further reading this book is an essential resource for students and interested readers alike as they navigate the literature on globalization studies Contagion Capitalism Sean Creaven,2023-12-15 Contagion Capitalism situates the COVID 19 pandemic within the systems of global political economy and their attendant cultural modes and theorizes that these systems act as facilitators and drivers of global pandemic risk Contagion Capitalism therefore critiques the institutionalized corporate capitalist control of the economy the state and science and the grave consequences this has on global public health policy the ecological crisis of sustainability and zoonotic pandemic events such as COVID 19 In doing so this book addresses the failings of what may be termed as state science or establishment science in managing the pandemic as personified especially by those elements of the scientific elite placed in the service of the neoliberal state This book also explores the limitations of corporate pharmacological technoscience in safeguarding public health arguing that Big Pharma offers only partial remedies for problems of human illness and well being poses its own dangers to public health and obfuscates the social bases of public ill health and of pandemic risk Contagion Capitalism further argues that COVID 19 will not be the last or even the most dangerous such epidemiological event This is because the social production and global dissemination of zoonotic diseases is integral to contemporary capitalism by virtue of its instrumental mode of science its central dynamic of production for the sake of accumulation and the consumer mode this sustains as its own condition of existence These are the drivers of what may be termed as zoonotic accelerationism Contagion Capitalism will appeal to scholars in the humanities and social sciences with interests in neoliberal ideology and global political economy and their impact upon social political and cultural life **New Developments in Environmental Sociology** M. R. Redclift,Graham Woodgate,2005 This outstanding collection which is a fully up to date companion to the title The Sociology of the Environment published in 1995 represents a landmark in a field of academic research that is increasingly important for wider policy questions Social Theories of Risk and Uncertainty Jens Zinn,2008-03-17 Provides an overview of the historical developments and conceptual aspects of risk and identifies why theorizing on risk is necessary and highlights specific sociological contributions to this field of research Explores key topics including risk society and reflexive modernization culture and risk governmentality and risk systems theory and risk and edgework and voluntary risk taking **System Change and Modernization** Władysław Adamski,1999 Revisions Lisa Adkins,2002 In so doing it puts forward a distinctive thesis namely that within late modernity gender and sexuality are being reworked in terms of categories of reflexivity and risk It shows that this reworking places increasing significance on issues of mobility and identity in late modernity It therefore outlines the politics of mobility in regard to identity suggesting that mobility is an important but often

neglected source of power in late modernity Revisions gender and sexuality in late modernity will be essential reading for advanced undergraduates research students and academics working in the fields of feminist theory social theory sociology women s studies and cultural studies Jacket
