Reading Miscellany in the Roman Empire Scott J. DiGiulio,2024 Aulus Gellius and his sole surviving work the Noctes Atticae NA have long stood on the periphery of Classical scholarship This second century CE compilation conventionally termed a miscellany collects vast amounts of otherwise lost ancient literature and the depictions of scholarly activity throughout the work have led some to see in Gellius a kindred spirit a Classicist avant la lettre Yet the NA is a fascinating work of literature in its own right depicting the intellectual and literary culture at the height of the Roman Empire and offering invaluable evidence for the evolution of Latin prose as a literary form in the Antonine period In contrast to previous scholarship that looks past the randomness of the NA this book argues that the conceit of disorder enabled Gellius to probe the nature of reading in the second century CE Gellius central preoccupation is articulating a distinct set of ways of reading that may be employed to navigate the web of literature in the Roman Empire In turn each of these ways of reading through material framing devices focal characters recurrent citations in dialogue with one another and allusive references to other near contemporary works can be used to examine Gellius collection and appreciate its literary qualities Incorporating inter and intratextual analysis alongside narratology informed approaches this book investigates the strategies used by Gellius to innovate within the Latin literary tradition and provides a framework for interpreting his *varietas* on its own terms
