Managing Operations:

Essential Guide to Operations Management David Bamford, Paul Forrester, 2010-08-30 This book is a novel treatment of Operations Management. It takes a fresh insight to this increasingly important topic exploring fundamental principles equally applicable to service and manufacturing situations. The book adopts a strategic stance by providing a framework for effective decision making and is aimed at practising managers who need to design working processes, manage change and make decisions within a strategic framework. The framework and supporting case vignettes allow the practitioner to grasp essential concepts quickly in a range of different operational contexts. Bamford and Forrester have done an excellent job in creating a concise, salient and appealing approach. They have captured the essential elements of designing processes, products and work organizations, exploring approaches to operations planning and control, managing change through effective project management and technology transfer, and then managing quality and improvement strategies. Professor Rob Handfield, Professor of Supply Chain Management, North Carolina State University, USA. This is an excellent concise text that introduces students to all of the key areas. It is an invaluable aid for students in understanding all of the major aspects of operations and their importance to the success of businesses. Professor Steve Brown, Professor of Management, University of Exeter Business School, University of Exeter, UK. For today's or tomorrow's business leaders, this text has well-structured, invaluable content ready for immediate adoption. Follow the guide, put it into practice, and the rewards will follow. Mr Vernon Barker, Managing Director, First TransPennine Express, First Group Plc, UK. This book combines technical theory, book smarts with real life experience, street smarts in a flowing read. Mr Stephen Oliver, Vice President, Marketing, Sales, Vicor Corporation, Boston, USA.

Operation Management B. Mahadevan, 2009 **Operations Management for MBAs** Jack R. Meredith, Scott M. Shafer, 2007 Designed for MBA students, this book offers a brief introduction to the basic concepts of operations management. It provides a strategic conceptual view of OM and the basics to complement class activities. **Managing Operations** Bob Johnson, Alan Hart, 2007-06-01 Managing Operations is a concise guide to the fundamentals of operations management. Using examples and case studies from public, private and voluntary sector organizations, this book will enable managers to develop their competency to an excellent standard in an industrial or commercial setting. As well as being very practically based, Managing Operations also provides the theory behind operations management. The book is based on the Management Charter Initiative's Occupational Standards for Management NVQs and SVQs at level 4. It is particularly suitable for managers on the Certificate in Management or Part 1 of the Diploma, especially those accredited by the IM and Edexcel. Managing Operations is part of the highly successful series of textbooks for managers which cover the knowledge and understanding required as part of any competency based management programme. The books cover the three main levels of management: supervisory first line management NVQ level 3, middle management Certificate NVQ level 4, and senior management Diploma NVQ level 5. Also included are titles which cover management issues in particular sectors such as

schools or the public sector in more depth You will find a full listing of other titles available at the front of this book Bob Johnson is a freelance management consultant and trainer with extensive experience of the retail service government and voluntary sectors He has managed operations in the sales marketing purchasing training and consultancy functions
