**Best Practices for Managing and Developing Virtual Project Teams** Gina Abudi, 2012 Managing teams in general is wrought with many challenges when you consider for example the various personalities on the team and the fact that likely many of your team members are working on other initiatives beside the project you are leading Throw a virtual team into the mix and you pile on the challenges Now you are dealing with a variety of cultural backgrounds team members who may never actually meet face to face and time zone differences that make scheduling meetings a challenge in and of themselves The increased complexity of managing virtual project teams requires strong team leadership This paper provides best practices for managing virtual project teams from kicking off the project team through to keeping the team engaged and moving forward and capturing lessons learned to make the ride a bit smoother the next time around It also looks at effectively managing the day to day performance of the team This paper also focuses on how virtual teams fail when they have no clear goals for the project and there are no clearly defined roles and responsibilities In addition it also shows how virtual teams fail when time is not invested in enabling the team to get to know each other developing strong working relationships and learning how to work together effectively in a virtual environment to meet the requirements of the project When Teammates Do Not Respond Niki Panteli, 2018 The case presents a real life situation that is often experienced among managers of virtual geographically dispersed project teams These are teams with limited if any face to face contact among co workers and team members Problems occur when there are changing project requirements and when there is poor coordination and communication among project team members themselves As such you want your co workers or even your project manager to communicate with you but they don't instead they remain silent In these conditions the dispersed members may feel frustrated rejected and withdrawn all of which have the potential to negatively affect individual and overall project performance The case asks what the manager's role should be in such situations Students are also encouraged to think in terms of what needs to be done in order to avoid such situations and build effective virtual teams

project manager of a virtual team has to join communication skills with intercultural skills In order to work together under these circumstances team building is crucial to make a virtual project a success Successful team building in a virtual project first of all means that people with the right characteristics have to be chosen to form a virtual project team For example they must have a high level of self organisation and social competence Furthermore building trust is crucial in order to make people who may never see each other in real life successfully work together In order to manage the task of a virtual project a project manager of such a team needs a high level of social skills coupled with the skills of a motivator The Blended Delivery model of Logica a global provider of IT services where a local core team works together with an extended virtual team may be a good compromise between virtual and non virtual project work and may combine benefits of bot
