Action Theory

- Behavioral psychology, also called behaviorism, is a learning theory that states that all behavior is acquired through conditioning.
- Behavioral theories, championed by famous psychologists such as John B. Watson and B. F. Skinner, dominated psychology in the first half of the 20th century.
- Behavioral techniques are still commonly used by therapists today to help clients learn new skills and behaviors.

Cognitive Theory

- Cognitive theories in psychology focus on internal states such as motivation, decision-making, thinking, and attention.
- Such theories attempt to explain a variety of mental processes, such as how the mind processes information and how thoughts lead to certain emotions and actions.
