This can be a challenge for leaders and others whose core business function is not directly related to artificial intelligence or computer science. This makes artificial intelligence an often daunting subject for many people noticing the AI changes around them, but this does not have to be an overwhelming subject. Artificial intelligence can be simply applied to business marketing strategies, social media engagement, and a host of other business functions. These AI applications can be accomplished no matter what the skill level of the user is.

**Artificial Intelligence Business Applications: A New Approach to AI and Machine Learning in Modern Business and Marketing for Beginners and Advanced** will teach readers how they can benefit from the AI wave to keep themselves and their business endeavors up to date. The benefits of users keeping on track of AI changes is obvious: AI allows businesses to link their data to AI, which can allow the business and the technology to evolve together. As the intelligence demonstrated by machines, AI will become more prominent and important as AI capabilities increase. From a practical standpoint, this means that businesses are faced with the reality of incorporating AI into their operations now or face being left so far behind that they will be relegated to playing an endless game of catchup.

In **Artificial Intelligence Business Applications: A New Approach to AI and Machine Learning in Modern Business and Marketing for Beginners and Advanced**, readers will learn not only the business strategies they can use to keep up with artificial intelligence, but the many powerful applications that AI can have in business, from automation of business processes and machine learning to predicting customer behavior and product pricing.
