**From Research to Operations in Weather Satellites and Numerical Weather Prediction** National Research Council,Commission on Geosciences, Environment, and Resources,Board on Atmospheric Sciences and Climate,2000-09-07 This workshop report examines the capability of the forecast system to efficiently transfer weather and climate research findings into improved operational forecast capabilities It looks in particular at the Environmental Modeling Center of the

National Weather Service and environmental observational satellite programs Using these examples the report identifies several shortcomings in the capability to transition from research to operations Successful transitions from R D to operational implementation requires 1 understanding of the importance and risks of the transition 2 development and maintenance of appropriate transition plans 3 adequate resource provision and 4 continuous feedback in both directions between the R D and operational activities
