Science Observed:

Has Science Found God? Victor J. Stenger, 2009-12-02 In the past few years a number of scientists have claimed that there is credible scientific evidence for the existence of God In 1998 Newsweek went so far as to proclaim on its cover Science Finds God Is this true Are scientists close to solving the greatest of all mysteries Physicist Victor J Stenger delves into this fascinating question from a skeptical point of view in this lucid and engrossing presentation of the key scientific facts Stenger critically reviews the attempts of many contemporary theologians and some scientists to resurrect failed natural theologies in new guises Whether these involve updated arguments from design anthropic coincidences or modern forms of deism Stenger clearly shows that nothing in modern science requires supernatural explanation He offers naturalistic explanations for empirical observations that are frequently given theistic interpretations for example that information in the universe implies an intelligent designer that a universe with a beginning requires a Creator and that the elegant laws of physics suggest a transcendent realm He shows that alleged spiritual nonmaterial phenomena do not lie beyond the experimental reach of physics This thorough and careful consideration of scientific evidence covers much ground yet remains accessible and highly informative to the educated lay reader
