**Developments in Surface Contamination and Cleaning, Volume 7** Rajiv Kohli,Kashmiri L. Mittal,2014-11-18 As  
device sizes in the semiconductor industries are shrinking they become more vulnerable to smaller contaminant particles and  
most conventional cleaning techniques employed in the industry are not as effective at smaller scales The book series  
Developments in Surface Contamination and Cleaning as a whole provides an excellent source of information on these  
alternative cleaning techniques as well as methods for characterization and validation of surface contamination Each volume  
has a particular topical focus covering the key techniques and recent developments in the area The chapters in this Volume  
address the sources of surface contaminants and various methods for their collection and characterization as well as methods  
for cleanliness validation Regulatory aspects of cleaning are also covered The collection of topics in this book is unique and  
complements other volumes in this series Edited by the leading experts in small scale particle surface contamination cleaning  
and cleaning control these books will be an invaluable reference for researchers and engineers in R D manufacturing quality  
control and procurement specification situated in a multitude of industries such as aerospace automotive biomedical defense  
energy manufacturing microelectronics optics and xerography Provides a state of the art survey and best practice guidance  
for scientists and engineers engaged in surface cleaning or handling the consequences of surface contamination Addresses  
the continuing trends of shrinking device size and contamination vulnerability in a range of industries spearheaded by the  
semiconductor industry and others Includes new regulatory aspects      *The Publishers' Trade List Annual* ,1973

Developments in Oils and Fats R. J. Hamilton,2012-12-06 This first volume in a series is intended to provide up to date  
information on specific topics in oils and fats The book will be especially valuable for any practising scientist or technologist  
who deals in any way with oils and fats whether from a nutritional surfactant cosmetic or analytical chemistry point of view  
In addition there is sufficient depth in most of the articles to catch the imagination of many more senior managers in the

industry The oils and fats industry is closely aligned with the food industry and it is no surprise to find that five of the chapters 1 2 3 6 and 7 are written from a food perspective The current arguments about diets and their fat content are well developed in Dr Enser s chapter on meat lipids He has presented a very balanced picture explaining that there are many reports which contradict the fashionable saturated fatty acids are bad theory This chapter will do much to illustrate the dietary implications of meat lipids and should stimulate discussion and further research
