Separation and Depression Edward C. Senay, John Paul Scott, 1973 *SEPARATION AND DEPRESSION- CLINICAL AND RESEARCH ASPECTS- SYMPOSIUM- MEETING- PAPERS- AAAS. , Separation and Depression* John Paul Scott, Edward C. Senay, 1973 Separation and Depression: Clinical and Research Aspects American Association for the Advancement of Science, 1973 *The Course of Life* , 1980 **The Course of Life: Adulthood and the aging process** , 1981 **Emotions in Personality and Psychopathology** Carroll Izard, 2013-11-11 Significant developments within the past few years have made possible the publication of this rather large volume focusing on specific emotions of human experience such as interest joy anger distress fear shame shyness and guilt The relevant events include new evidence on the relationship of emotions to cognitive processes and to personality traits and defense mechanisms They also include discoveries relating to the biological foundations of emotions and theory regarding their significance in human evolution Finally there have been important findings on the role of emotions and emotion expressions in social relations pain grief and psychopathology These developments are elaborated in the pages of this volume The contributors represent the disciplines of clinical social and experimental psychology psychiatry and psychoanalysis The contributions show important common themes that cut across disciplines but they also reflect some differences that invite further thought and research Above all they add to our knowledge of human emotions and to our ability to understand and resolve human problems The Department of Psychology of the University of Delaware has provided an excellent intellectual climate for work on a volume that ranges across several specialities and disciplines Conversations with colleagues in the offices and hallways of Wolf Hall have provided answers to many questions They also yielded some questions that compelled me to seek greater clarification of an issue **DHHS Publication No. (ADM)** , 1985 The Origins of Depression: Current Concepts and Approaches J. Angst, A. Carlsson, B.J. Carroll, H. Helmchen, A. Herz, G.I. Klerman, W.T. McKinney, 2012-12-06 3 and a fraction may not respond to treatment On the behavioral level animal research shows that a variety of experimental conditions can induce depression The same is true in the field of treatment where pharmacologically highly different drugs can equally alleviate depression in animals and humans The question as to whether this is due to a heterogeneity of depressive subjects based on different pathogenetic mechanisms is open to discussion We can look for common features of all possible causal factors in the hope of finding a single basic mechanism Many divergent findings may also be explained as peripheral changes of a highly complicated dynamic system In the field of psychopharmacology a circular reasoning has become evident in the sense that originally the clinical antidepressive response was founded on empirical grounds only In a second step an attempt was made to characterize some clinically active compounds pharmacologically and in a third further compounds were developed based on aspects of the pharmacological profiles Moreover the post hoc development of a pharmacological screening method has the serious disadvantage of delaying breakthroughs into new fields **Psychology Library Editions: Comparative**
