Performance and Control of Next-generation Communications Networks ,2003 **Performance, Quality of Service, and Control of Next-Generation Communication Networks II** ,2004 Performance, Quality of Service, and Control of Next-generation Communications Networks II Robert D. van der Mei,2004 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature *Quality of Service Architectures for Wireless Networks: Performance Metrics and Management* Adibi, Sasan,Jain, Raj,Parekh, Shyam,Tofighbakhsh, Mostafa,2010-01-31 This book further explores various issues and proposed solutions for the provision of Quality of Service QoS on the wireless networks Provided by publisher **Performance, Quality of Service, and Control of Next-generation Communication Networks III** ,2005 Next-generation Communication and Sensor Networks, 2006 Mohammed Atiquzzaman,Sergeï I. Balandin,2006 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature **Performance and control of next-generation communications networks** ,2004 **Performance and Control of Next-generation Communication Networks** ,2003

Resource Management and Performance Analysis of Wireless Communication Networks Shunfu Jin,Wuyi Yue,2021-03-15 With the diversification of Internet services and the increase in mobile users efficient management of network resources has become an extremely important issue in the field of wireless communication networks WCNs Adaptive resource management is an effective tool for improving the economic efficiency of WCN systems as well as network design and construction especially in view of the surge in mobile device demands This book presents modelling methods based on queueing theory and Markov processes for a wide variety of WCN systems as well as precise and approximate analytical solution methods for the numerical evaluation of the system performance This is the first book to provide an overview of the numerical analyses that can be gleaned by applying queueing theory traffic theory and other analytical methods to various WCN systems It also discusses the recent advances in the resource management of WCNs such as broadband wireless access networks cognitive radio networks and green cloud computing It assumes a basic understanding of computer networks and queueing theory and familiarity with stochastic processes is also recommended The analysis methods presented in this book are useful for first year graduate or senior computer science and communication engineering students Providing information on network design and management performance evaluation queueing theory game theory intelligent optimization and operations research for researchers and engineers the book is also a valuable reference resource for students analysts

managers and anyone in the industry interested in WCN system modelling performance analysis and numerical evaluation

NETWORKING 2006. Networking Technologies, Services, Protocols; Performance of Computer and Communication Networks; Mobile and Wireless Communications Systems Fernando Boavida, Thomas Plagemann, Burkhard Stiller, Cedric Westphal, Edmundo Monteiro, 2006-04-27 Here are the refereed proceedings of the 5th International IFIP TC6 Networking Conference NETWORKING 2006 The 88 revised full papers and 31 poster papers are organized in topical sections on caching and content management mobile ad hoc networks mobility handoff monitoring measurements multicast multimedia optical networks peer to peer resource management and QoS routing topology and location awareness traffic engineering transport protocols wireless networks and wireless sensor networks

Resource Allocation and Performance Optimization in Communication Networks and the Internet Liansheng Tan, 2017-08-15 This book provides a comprehensive introduction to the underlying theory design techniques and analytical results of wireless communication networks focusing on the core principles of wireless network design It elaborates the network utility maximization NUM theory with applications in resource allocation of wireless networks with a central aim of design and the QoS guarantee It presents and discusses state of the art developments in resource allocation and performance optimization in wireless communication networks It provides an overview of the general background including the basic wireless communication networks and the relevant protocols architectures methods and algorithms

Performance Optimization of IP Multimedia Subsystem Mlindi Mashologu, 2010-06-18 The IP Multimedia Subsystem IMS is the basic network architecture for Next Generation Networks NGN which is intended to bridge the divide between the traditional circuit switched and packet switched networks thereby providing a single network capable of providing all service offerings IMS is based on the IP infrastructure and it enables the convergence of data speech and video on the same network platform The IMS forms the basis of Fixed Mobile Convergence FMC where fixed line operators are striving to provide mobile access and mobile operators are trying to provide fixed access This is done to provide both services to a customer in a single device The IMS is based on Session Initiation Protocol SIP which is a text based protocol The IMS will generally create additional signaling traffic in the IP based networks so there is a need to take necessary precautions to minimize the signaling overload This research is based on how the performance of the IMS can be improved by optimization of SIP as well as IMS elements An analysis and characterization of the signaling traffic generated by IMS has been performed and how the signaling traffic can be reduced by the compression of SIP using the Burrows Wheeler Transform BWT has been explored The queuing models of the IMS have been formulated and the mathematical approach has been used to find the impact of implementing the Hyper Threading technology on the IMS Elements

Distributed Computer and Communication Networks: Control, Computation, Communications Vladimir M. Vishnevskiy, Konstantin E. Samouylov, Dmitry V. Kozyrev, 2021-01-04 This book constitutes the refereed proceedings of the 23rd International Conference on Distributed and Computer and Communication Networks DCCN 2020

held in Moscow Russia in September 2020 Due to the COVID 19 pandemic the conference was held online The 43 papers were carefully reviewed and selected from 167 submissions The papers are organized in the following topical sections computer and communication networks and technologies analytical modeling of distributed systems and distributed systems applications *Multimedia Systems and Applications II* Andrew G. Tescher,1999 This work presents a series of papers examining various aspects of multimedia systems and applications **Journal of the Communications Research Laboratory** ,1991 MILCOM 1999 IEEE Communications Society,1999 *Signal* ,1993 Conference Record ,1976 *Undergraduate and Graduate Courses and Programs* Iowa State University,2009 Proceedings of the Conference on Applications, Technologies, Architectures, and Protocols for Computer Communication ,1999
