**Science and Hermeneutics** Vern S. Poythress, 1988 Many years ago upon reading Thomas S Kuhn s work *The Structure of Scientific Revolutions* I was taken aback by the obvious parallels between the subject of that book and the field of biblical exegesis It seemed strange then and more so now after all these years that no one had sought to draw out the implications of Kuhn s ideas for better understanding the conflicts that frequently arise over the interpretation of Scripture from the preface In this new volume of the *Foundation of Contemporary Interpretation* series Vern Poythress gives an explanation of the conflicts that often arise between science and the interpretation of Scripture Novices and experts alike will be fascinated by the author s clear and perceptive account of the relationship between science and hermeneutics Pythress analysis will help students of the Bible appreciate the origin and nature of interpretive disputes aid students in developing exegetical skills and allow students to examine opposing views

**Hermeneutics** Charles Craig Lantz, 2012 This brief and concise handbook will help equip you by gaining a better understanding of the Bible as you learn the rules science and art of Biblical interpretation Hermeneutics is the formal process by which the interpreter employs certain principles and methods in order to derive the author s intended meaning Indeed hermeneutics is the science and art of Biblical interpretation It is a science because it is guided by rules within a system and it is an art because the application of the rules is by skill and not by mechanical imitation In order for a person to properly interpret the Bible you must be knowledgeable of the rules of hermeneutics in order to be guided into the right interpretation of the Scriptures and the proper Biblical message This concise and brief handbook will cover An Introduction to Biblical Hermeneutics The History of Biblical Interpretation Historical Cultural and Contextual Analysis Lexical Syntactical Analysis Theological Analysis Special Literary Methods such as Similes Metaphors Proverbs Parables and Allegories Special Literary Methods such as Types Prophecy and Apocalyptic Literature The last chapter of this handbook will teach you how to apply the Biblical message and present a Proposal for the Transcultural Problem For the beginning Bible student this is a MUST READ [Essays in the Hermeneutics of Science](#) Dimitri Ginev, 2018-12-17 Published in 1997 this volume is written from a hermenutico phenomenological point of view The essays cover a spectrum of relevant issues the essential interpretation of science the possibility of a strong hermeneutics of science that takes into consideration science s cognitive structure the implications of existential ontological interpretations of science for the post metaphysical dialogue between hermeneutics and epistemology the place of rhetorical tools in the human sciences and the strategies of overcoming the legitimation crisis of the human sciences Because of its commitment to the radical universalization of the hermeneutic problem the strong programme of hermeneutics of science suggested in this book avoids both objectivism and relativism In

this regard the essays must be read in relation to the search for a middle way between defending epistemic rationality as a basis for further development of the project of modernity and the postmodern deconstruction of all cognitive identities of modernity

Babich, 2013-06-29 perceptual essences that can be rendered directly manifest in perception with the help of theoretically structured instruments serving as readable technologies Scientific knowledge should thus be understood as an extension of unassisted perception A perceptual fact has an outer horizon which separates it from the ground on which it appears and an inner horizon composed of a multiplicity of possible perceptual profiles organized by an invariant essence The perceiving subject can bring forth a representative sample of the profiles in question occasionally by making use of certain technological processes which are themselves subject to interpretation in terms of theoretical representations The theoretical entities described in these representations are not simply detected thanks to an inferential operation but rather they are directly perceived It follows from this that the correspondence between the manifest image and the scientific image is not done one to one but by a many to one or one to many application between contextually defined perceptual objects within contexts that are mutually incompatible but complementary This should not however be understood as a form of conventionalism nor as a form of cultural relativism Pre comprehension which guides interpretation imposes strict limits to the descriptive categories which can be used and to the manner in which they can be linked to appropriate empirical objects The author applies his hermeneutic principles to the study of visual perception In fact this question is treated in the first part of the book
