Science And Philosophy Past And Present:

Science and Philosophy Derek Gjertsen,1992 Science ,1930 *Debating Contemporary Approaches to the History of Science* Lukas M. Verburgt,2024-01-11 *Debating Contemporary Approaches to the History of Science* explores the main themes problems and challenges currently at the top of the discipline s methodological agenda In its chapters established and emerging scholars introduce and discuss new approaches to the history of science and revisit older perspectives which remain crucial Each chapter is followed by a critical commentary from another scholar in the field and the author s response The volume looks at such topics as the importance of the global digital environmental and posthumanist turns for the history of science and the possibilities for the field of moving beyond a focus on ideas and texts towards active engagement with materials and practices It also addresses important issues about the relationship between history of science on the one hand and philosophy of science history of knowledge and ignorance studies on the other With its innovative format this volume provides an up to date authoritative overview of the field and also explores how and why the history of science is practiced It is essential reading for students and scholars eager to keep a finger on the pulse of what is happening in the history of science today and to contribute to where it might go next

All About Science: Philosophy, History, Sociology & Communication Lui Lam, Maria Burguete,2014-10-15 There is a lot of confusion and misconception concerning science The nature and contents of science is an unsettled problem For example Thales of 2 600 years ago is recognized as the father of science but the word science was introduced only in the 14th century the definition of science is often avoided in books about philosophy of science This book aims to clear up all these confusions and present new developments in the philosophy history sociology and communication of science It also aims to showcase the achievement of China s top scholars in these areas The 18 chapters divided into five parts are written by prominent scholars including the Nobel laureate Robin Warren sociologist Harry Collins and physicist turned historian Dietrich Stauffer
