Science Subjectivity:

The Subjectivity of Scientists and the Bayesian Approach S. James Press, Judith M. Tanur, 2016-03-16 Originally published New York John Wiley Sons Inc 2001 Consciousness , **Forensic Anthropology** C. Clifford Boyd, Jr., Donna C. Boyd, 2017-12-12 Provides comprehensive coverage of everything that students and practitioners need to know about working in the field of forensic anthropology Forensic anthropology has been plagued by questions of scientific validity and rigor despite its acceptance as a section in the American Academy of Forensic Sciences nearly half a century ago Critics have viewed it as a laboratory based applied subfield of biological anthropology and characterised it as emphasising methodology over theory This book shows that these views are not only antiquated but inadequate and inaccurate Forensic Anthropology Theoretical Framework and Scientific Basis introduces readers to all of the theoretical and scientific foundations of forensic anthropology beginning with how it was influenced by the early theoretical approaches of Tyler Morgan Spencer and Darwin It instructs on how modern forensic science relies on an interdisciplinary approach with research being conducted in the fields of archaeology physics geology and other disciplines This modern approach to theory in forensic anthropology is presented through the introduction and discussion of Foundational Interpretive and Methodological theories Sections cover Bias and Objectivity in Forensic Anthropology Theory and Practice The Theory and Science Behind Biological Profile and Personal Identification Scientific Foundation for Interpretations of Antemortem Perimortem and Postmortem Processes and Interdisciplinary Influences Legal Ramifications and Future Directions Illustrates important aspects of the theory building process and reflects methods for strengthening the scientific framework of forensic anthropology as a discipline Inspired by the Application of Theory to Forensic Anthropology symposium presented at the 67th annual meeting of the American Academy of Forensic Sciences Chapters written by experts in the field who were presenters at the symposium Forensic Anthropology Theoretical Framework and Scientific Basis is ideal for university courses in anthropological science forensic science criminal science and forensic archaeology *Qualitative Research & Evaluation Methods* Michael Quinn Patton, 2023-02-07 Drawing on more than 40 years of experience conducting applied social science research and program evaluation author Michael Quinn Patton has crafted the most comprehensive and systematic book on qualitative research and evaluation methods inquiry frameworks and analysis options available today Now offering more balance between applied research and evaluation this Fourth Edition illuminates all aspects of qualitative inquiry through new examples stories and cartoons more than a hundred new summarizing and synthesizing exhibits and a wide range of new highlight sections sidebars that elaborate on important and emergent issues For the first time full case studies are included to illustrate extended research and evaluation examples In addition each chapter features an extended rumination written in a voice and style more emphatic and engaging than traditional textbook style about a core issue of persistent debate and controversy Constructed Truths Thomas Zoglauer, 2023-02-09 In a world in which more and more fake news is being spread it is

becoming increasingly difficult to distinguish truth from lies knowledge from opinion Disinformation campaigns are not only perceived as a political problem but the fake news debate is also about fundamental philosophical questions What is truth How can we recognize it Is there such a thing as objective facts or is everything socially constructed This book explains how echo chambers and alternative worldviews emerge it blames post factual thinking for the current truth crisis and it shows how we can escape the threat of truth relativism

Weird Competitions Mira Donnelly, AI, 2025-03-06 Weird Competitions explores the fascinating world of unconventional contests delving into the cultural and social dynamics that drive individuals to participate in seemingly bizarre activities From cheese rolling races rooted in ancient traditions to international mustache sculpting championships the book examines how these competitions reflect cultural values and foster community bonds It reveals how these alternative avenues for self expression and achievement offer insights into human motivation and the search for recognition The book argues that these activities far from being trivial provide profound insights into human nature and the construction of culture Many weird competitions have historical roots connecting participants to the past and creating a sense of shared identity These contests challenge conventional notions of success highlighting the diverse ways people find purpose and fulfillment outside mainstream sports The book unfolds in three sections introducing the concept of weird competitions exploring their historical and sociological underpinnings with case studies and ethnographic data and analyzing their broader implications for cultural preservation and individual psychology By examining the rules rituals and participant motivations the book reveals how societies define value and foster social cohesion
