Media Coverage Of Terrorism Methods Of Diffusion:

Media Coverage of Terrorism A. Odasuo Alali, Kenoye Kelvin Eke, 1991-05 The critical issues confronting media coverage of terrorism are examined in this book Using specific terrorist incidents it analyzes the selective labelling of acts of political violence and the symbolic nature of the specific characterization What is the journalist s role in terrorist events Does media coverage serve to encourage terrorism These and other questions are examined within the triad relationship between government media and terrorist s It also examines the implications of media coverage of acts of political violence on visual communication research Media Coverage of Terrorism ,2002 Media Coverage of Terrorism and Methods of Diffusion Rahul Chakravariti, 2009-01-01 The use of terrorism as a violent political strategy has been increasing steadily throughout the world during last few decades It is therefore worthwhile to examine the role of media in relation to terrorism The critical issues confronting media coverage of terrorism are examined in this book Using specific terrorist activities it analyzes the selective labeling of acts of political violence and the symbolic nature of the specific characterization It also examines the implications of media coverage of acts of political violence for visual communication research This interdisciplinary key on media coverage of terrorism is designed for professional and students of journalism mass communication criminal justice and political science It also appropriate for the related fields of psychology sociology and criminology *The SAGE Encyclopedia of Terrorism, Second Edition* Gus Martin, 2011-06-15 Six years after publication of the first edition of the best selling Encyclopedia of Terrorism much has changed on the national security scene Despite the dark promises of Osama bin Laden following the 9 11 attacks the United States has not experienced any major domestic terror incidents Al Qaeda itself is believed to be a severely crippled organization But while U S wars in Afghanistan and Iraq not to mention the arrival of the Obama administration a new balance of power within Congress and an increasingly fragile economic picture have significantly affected the national security picture the threat of economic chaos and massive loss of life due to terror attacks has not abated Indeed in July 2008 analysts pointed out that even a relatively small terrorist organization could present a dire threat with some experts arguing that a biological chemical or even nuclear attack on a major U S city is all but inevitable In this highly charged rapidly shifting environment we are pleased to present the The SAGE Encyclopedia of Terrorism Second Edition a thoroughly updated and expanded edition of the original highly regarded reference work Nearly 100 000 words of new material will be added along with fully updated original entries and expanded coverage New introductory essays will explore the impact of terrorism on economics public health religion and even pop culture Ethical issues such as the role of torture in interrogations competing notions of security versus liberty and the debates over FISA legislation and Guantanamo Bay will also be covered Two dozen entries on significant recent events such as the London bombings Chechen attacks on Russian interests and the rescue of Ingrid Bettancourt and some 60 additional new entries will restore the work as an up to the minute natural first stop for researchers The Handbook of International Crisis

Communication Research Andreas Schwarz, Matthew W. Seeger, Claudia Auer, 2016-04-18 The Handbook of International Crisis Communication Research articulates a broader understanding of crisis communication discussing the theoretical methodological and practical implications of domestic and transnational crises featuring the work of global scholars from a range of sub disciplines and related fields Provides the first integrative international perspective on crisis communication Articulates a broader understanding of crisis communication which includes work from scholars in journalism public relations audience research psychology political science sociology economics anthropology and international communication Explores the topic from cross national and cross cultural crisis communication approaches Includes research and scholars from countries around the world and representing all regions Discusses a broad range of crisis types such as war terrorism natural disasters pandemia and organizational crises

Terrorism and the News Media A. Odasuo Alali, Gary W. Byrd, 1994 Terrorism and the news media share a symbiotic relationship both command attention deliver a message and shape opinion Current research indicates that terrorist incidents are among the most often used lead in stories on television s evening news The focus here is on how the news media cover terrorism in their reporting Over 600 entries are divided into three areas understanding terrorism terrorism in the electronic media and terrorism in the print media

Reporting Thailand's Southern Conflict Phansasiri Kularb, 2016-02-12 Since 2004 Thailand s southern border provinces have been plagued by violence There are a wide array of explanations for this violence from the revival of Malay nationalist movements and the influence from the global trend of radical Islam to the power play among the regional underground crime syndicates politicians and state authorities The disparate interpretations signal the dynamic and complex discursive contention of this damaging and enduring conflict and this book looks at how this is played out in the Thai media and with what possible consequences In analysing the southern conflict coverage the book presents the deficiencies in news coverage as produced by four news organisations of different natures across a seven year review period and discusses the professional practices that hinder journalism from serving as a fair arena for healthy and rational democratic debates Based on in depth interviews with news workers it argues that Thai journalism is not always monolithic and static as shown in the discursive shifts in news content the variations of journalistic practices and news workers disparate stances on the conflict The book goes on to highlight the less immediately apparent difficulties of political conflict reporting such as the subtle patterns of intimidation and media manipulation as well as the challenges of countering socially prevailing hegemonic beliefs in Thai society Exploring the political contingencies and socio cultural influences at play this book provides an in depth study of journalism s role in politics in Thailand and is of interest to students and scholars of Southeast Asian Politics Media Studies and Peace and Conflict Studies

Conflict in Moro land: Prospects for Peace? (Penerbit USM) Arndt Graf, Peter Kreuzer, Rainer Werning, 2014-11-25 The civil war in the Islamic Southern Philippines is one of the longest lasting conflicts in Southeast Asia This book dates back to a workshop on that conflict at the Department of Political Science of the University of Gottingen

Germany The particular interest in the Moro conflict in Gottingen is due to the fact that a family from that city was among those tourists who were kidnapped in Sipadan Malaysia by the Abu Sayyaf group in spring 2000 and held hostage on the island of Jolo Sulu for almost half a year Although the geographical and cultural backgrounds of most of the contributors to this volume differ from the parties involved in the conflict the editors hope that this volume offers adequate views theoretical approaches and methodologies which prove helpful in understanding and eventually ameliorating the conditions of the people living in Moro land

Now Vincent Lavoie,2003-01-01 While the crisis that took place in photojournalism during the 1960 s brought about a significant shift in the practices discourses and institutional structures of press photography it also affected the practices of artists specifically with regard to work devoted to revitalizing the depiction of events The art world attempted to revitalize the historical genre by undertaking its critical rereading in the spirit of restoring a tradition diminished by the mass media The problem may be expressed in these terms How can history be depicted bearing in mind that the media mainly photojournalism and the electronic press have claimed a monopoly of the genre unto themselves At issue is the sizeable problem of mass media omnipotence as an obligatory referential universe for historiographical artistic practices Today it seems impossible to depict the event in any way other than by accentuating or eschewing the formal attributes rhetorical artifices and ideological precepts of the mass media These approaches to addressing historical moments have been examined in this article both because they epitomize contemporary historical writing and for the most part they constitute critical responses to stereotyped depictions of events Above all they represent a paradigm shift the mass media s prerogatives for depicting historical moments has shifted towards the field of art Contemporary depictions of catastrophe crimes sensationalist news items terrorist attacks humanitarian disasters genocides common themes in many of the artistic projects represented in the 8th edition of the *Mois de la Photo a Montreal* have been especially striking in this respect For of all contemporary events catastrophes are the most likely to be spontaneously propelled to the top of the news roster and the most susceptible to the various inflections of contemporary art photography

Terrorism in Western Europe Jan Oskar Engene, 2004 This important book examines why terrorism prevails in the otherwise stable and advanced democracies of Western Europe and why some countries have been more severely hit than others Whilst Western Europe today seems relatively peaceful some countries in this region have in fact experienced significantly high levels of terrorism for decades Moreover the threat has not only come from international terrorists operating in Europe but as a result of internal conflicts which have produced terrorist campaigns conducted by groups originating in the countries themselves The author maps the trends in internal terrorism in 18 Western European countries since 1950 and explains those trends both from a theoretical and empirical perspective He uses a unique data set called TWEED which covers around 9000 terrorist attacks and records the activities of about 200 terrorist groups over the post war period Offering a historical and comparative approach to terrorism unlike the more usual focus on contemporary threats and developments this book will appeal to political and social scientists and students especially those working in comparative politics or on the causes of conflict Academics interested in European studies and more specifically the conditions and developments of European democracy and policymakers concerned with the development of the terrorist threat in Europe will also find the book of great interest

Communication Research, 1992

Terrorism, 1992-1995 Edward F. Mickolus, Susan L. Simmons, 1997 This is the author's fifth chronology on international terrorism The volumes cover the period from 1968 through 1995 and provide the most comprehensive picture of international terrorist activities ever published As with the last four volumes this one also contains a bibliography on the key literature on the topic Terrorism in the period covered by this volume 1992 to 1995 followed many of the trends seen in the previous two decades While most people recall the spectacular events those were infrequent due in part to the security cooperation of like minded governments Most terrorist events were low level bombings with few casualties But the period saw the advent of a new type of terrorist non group Composed of small loosely organized bands of zealots with widespread contacts they have made combatting terrorism all the more difficult Given the problems of tracing groups and uncovering patterns this volume will be invaluable for scholars and researchers involved with contemporary nationalism fundamentalist groups and international terrorism
