SCIENCE LABS

ABOUT THE LABS

- The included labs are designed to support the science they are flexible and may be used in a few different ways:
- Complete each lab after your class completes the whole-class or small-group.
 - Set up all labs on one day at the end of the unit. As you go through the labs to reinforce what they have learned.
 - Assign one lab to each small group. Have that group become the lab "experts." Then, groups can report.
 - Or, several reports can remain with the lab while you go through the stations. Then, the experts help the other groups do the lab. (You'll come halfway through an attempt to be the helper and to complete all of the labs.)
- The lab pages are designed by the teacher information card at the end of the lab. The following section shows the lab and the observations can be placed with lab materials or in a notebook completed as a whole-class activity.

JOURNALING

Each lab comes with a related recording and observation sheet at the end of the observation journal. Note that the journals also include space for the student's journal. To assemble the journal, follow the directions in the Observation Journal document.

If your class won't be completing all of the labs, you can use the journal's space.
