## **Science Studies An Advanced Introduction:**

Science Studies David J. Hess, 1997-10 The first comprehensive survey of the nascent field of science studies Thrust into the public eye by the contentious Science Wars played out most recently by physicist Alan Sokal's hoax the nascent field of science studies takes on the political historical and cultural dimensions of technology and the sciences Science Studies is the first comprehensive survey of the field combining a concise overview of key concepts with an original and integrated framework In the process of bringing disparate fields together under one tent David J Hess realizes the full promise of science studies long uncomfortably squeezed into traditional disciplines He provides a clear discussion of the issues and misunderstandings that have arisen in these interdisciplinary conversations His survey is up to date and includes recent developments in philosophy sociology anthropology history cultural studies and feminist studies By moving from the discipline bound blinders of a sociology history philosophy or anthropology of science to a transdisciplinary field science studies Hess argues will be able to provide crucial conceptual tools for public discussions about the role of science and technology in a democratic society *Advanced Introduction to Empirical Legal Research* Herbert M. Kritzer, 2021-02-26 Herbert Kritzer presents a clear introduction to the history methods and substance of empirical legal research ELR Quantitative methods dominate in empirical legal research but an important segment of the field draws on qualitative methods such as semi structured interviews and observation In this book both methodologies are explored alongside systematic data analysis Offering an overview of the broad ELR literature the institutions of the law the central actors of the law and the subjects of the law are each addressed in this highly readable account that will be essential reading for legal researchers *Dynamics of Disaster* Barbara Allen, Rachel A. Dowty Beech, 2013-09-13 Disasters are the result of complex interactions between social and natural forces acting at multiple scales from the individual and community to the organisational national and international level Effective disaster planning response and recovery require an understanding of these interacting forces and the role of power knowledge and organizations This book sheds new light on these dynamics and gives disaster scholars and practitioners new and valuable lessons for management and planning in practice The authors draw on methods across the social sciences to examine disaster response and recovery as viewed by those in positions of authority and the recipients of operations These first two sections examine cases from Hurricane Katrina while the third part compares this to other international disasters to draw out general lessons and practical applications for disaster planning in any context The authors also offer guidance for shaping institutional structures to better meet the needs of communities and residents *Handbook of the Sociology of Health, Illness, and Healing* Bernice A. Pescosolido, Jack K. Martin, Jane D. McLeod, Anne Rogers, 2010-12-17 The Handbook of the Sociology of Health Illness Healing advances the understanding of medical sociology by identifying the most important contemporary challenges to the field and suggesting directions for future inquiry The editors provide a blueprint for guiding research and teaching agendas for the first quarter of the 21st century In

a series of essays this volume offers a systematic view of the critical questions that face our understanding of the role of social forces in health illness and healing It also provides an overall theoretical framework and asks medical sociologists to consider the implications of taking on new directions and approaches Such issues may include the importance of multiple levels of influences the utility of dynamic life course approaches the role of culture the impact of social networks the importance of fundamental causes approaches and the influences of state structures and policy making *Hypatia* ,2008

**Out in Psychology** Victoria Clarke,Elizabeth Peel,2007-05-07 Recent media debates on subjects such as same sex marriage have fueled an interest in lesbian gay bisexual transsexual and queer LGBTQ perspectives This text presents the latest thinking in LGBTQ psychology with an international look at this complex subject *Re-presenting Science*  
Christopher Owen Ritter,2001 *Journal of the History of Sexuality* ,2003 **War Between Social Worlds** Bruce Evan Goldstein,2004 *Making Meteorology* Mikaela Sundberg,2005 This thesis is about the production of knowledge in meteorological research Meteorology is an interesting case because of its crucial role in defining the climate change problem but also because of its reliance on simulation modeling a comparatively little studied scientific practice The thesis provides an analysis of the central practices of simulation modeling and field experimentation It draws upon concepts from social world theory where practice is closely related to work The thesis also employs the notion of translation as developed by the actor network approach in order to analyse how different practices and entities become associated with each other Empirical data was collected with interviews and participant observation and most of the fieldwork was conducted at the Department of Meteorology Stockholm University **Impure Cultures** Daniel Lee Kleinman,2003-09-17 Kleinman rural sociology U of Wisconsin Madison explores the pervasive influence of the world of commerce on academic biology drawing from what he learning as a participant observer in one university biology laboratory for six months He focuses on how corporate domination of an investigation early in its development can indirectly affect the questions that are asked and the answers that are acceptable even in later research that is not corporate funded Annotation 2004 Book News Inc Portland OR booknews com [Democracy, Civil Society and Environment](#) ,2002 **Environment and Planning** ,2001 **Six Lenses for Anti-oppressive Education** Kevin K. Kumashiro,Bic Ngo,2007 This book offers a range of conceptual and curricular resources for elementary and secondary educators as well as teacher educators interested in exploring new and innovative ways to challenge racism classism sexism heterosexism and other forms of oppression in the classroom It blends analyses of and recommendations for K 12 education and teacher education and focuses on the barriers we often confront when teaching learning and learning to teach toward social justice The authors work in K 12 schools and teacher education programs across North America and advocate perspectives and practices that when combined promise to take the field of anti oppressive education in helpful groundbreaking directions This book is divided into six parts each part consisting of two or three chapters that explore in different ways a theme of anti oppressive education The chapters reflect a range of content areas

social studies English language arts foreign languages health natural sciences and mathematics in both K 12 education and teacher education student and teacher populations elementary secondary university social differences and oppressions based on race culture social class gender sexual orientation language age disabilities activities simulations service learning book clubs lesson planning and research methods historiography curriculum analysis discourse analysis case study self study

The Active Society Revisited Wilson C. McWilliams, 2006 The Active Society published in 1968 is the most ambitious book in Amitai Etzioni's remarkable career In this new collection of essays Wilson Carey McWilliams brings together scholars in a range of disciplines to analyze the significance and shortcomings of this important work *Disciplinary Styles in the Scholarship of Teaching and Learning* Mary Taylor Huber, Sherwyn P. Morreale, 2002 Will the scholarship of teaching and learning find its home with other pedagogical discussions on the margins of most disciplines Or will it be registered and legitimated within the heart of the disciplines themselves In response to an orienting essay raising such questions scholars from 10 disciplines describe the evolution of discourse about teaching and learning in their field the ways in which their discipline's style of discourse influences inquiry into teaching and learning and the nature and role of intellectual exchange across disciplines around such inquiry Whatever the future of the scholarship of teaching and learning it will no longer be mostly a matter of parallel play In presenting the sounds and silences of these 10 disciplines to a polyglot audience this volume's contributors seek to help develop a common language for trading ideas enlarging our pedagogical imaginations and strengthening our scholarly work *Proof & Truth* Iain McCalman, Ann Margaret McGrath, 2003 Lawyers historians anthropologists and literary scholars draw heavily on the concepts of evidence proof and truth but these crucial terms generally carry distinct and incommensurate meanings for each discipline or professional practice The consequences of these differences are more than academic Divergent understandings of proof and truth have serious practical implications when humanists present themselves as expert witnesses in court cases involving vital contemporary issues such as indigenous land ownership cultural heritage social policy and legal administration With reference to controversial and landmark cases this collection of cross disciplinary essays probes the convergences and incompatibilities between legal and humanistic understandings and opens the way for a more constructive and informed courtroom role for experts of all kinds *The Blackwell Encyclopedia of Sociology: ST-Z* George Ritzer, 2007 *Forthcoming Books* Rose Arny, 1997-12 *Managing Risk and Uncertainty During a Novel Epidemic* Maya Ponte, 2005 This dissertation is an analysis of the strategic management of risk and uncertainty in health policy The question I have posed is how does the government and its scientific advisers attempt to control the future of a disease when many gaps in our knowledge persist In particular I focus on selected debates discussions and decisions surrounding the management of Transmissible Spongiform Encephalopathies TSEs or prion diseases in both the US and UK over the past two decades Between the summer of 2001 and the spring of 2005 I conducted participant observation research in a variety of settings Beginning with a few nodes in the network of prion disease

management I followed the network to other nodes or sites where knowledge was being produced disease management actions were being discussed and decisions were being made In addition I conducted semi structured interviews with 10 family members of patients diagnosed with prion disease 15 past or present US and UK government employees in positions dealing with prion disease risk management and 48 scientists from the US UK France Germany and Switzerland I found that risk and uncertainty were managed strategically through recourse to metaphors These metaphors included model systems of the disease and past experiences with other diseases Uncertainty was further marginalized or rather disguised by employing Future Oriented Statistical Projections or predictions of the ensuing course of a disease based on the aforementioned metaphors By presenting the future course of a disease as knowable through numbers the remaining uncertainties appeared to melt away Further risk was often treated as though it could be bounded spatially and temporally through recourse to bodily geographic and temporal metaphors while the attendant uncertainties were bracketed to produce a momentary feeling of certainty These strategies offered a means of cloaking risk management decisions in a guise of rationality despite the underlying uncertainties involved In this way governments advisory committees and other institutions charged with managing disease upheld their mandate to plan for the future in a rational manner Such rationality was often only temporary in appearance readily dissolving as uncertainties resurfaced
