## **Masaccio's Trinity:**

The New Art of the Fifteenth Century: Faith and Art in Florence and The Netherlands Shirley Neilsen Blum, 2013-09-03 A fresh look at the early Renaissance considering Florentine and Netherlandish art as a single phenomenon at once deeply spiritual and entirely new Adam and Eve are driven from the Garden of Eden into a rocky landscape their naked bodies lit by a cold sun their gestures and expressions a study in shame and anguish A serious man well attired kneels in prayer before the Virgin and Child close enough to touch them almost his furrowed brow setting off the saintly perfection of their features In fifteenth century Florence and Flanders painters were using an arsenal of new techniques including perspective anatomy and the accurate treatment of light and shade to present traditional religious subjects with an unprecedented immediacy and emotional power Their art was the product of a shared Christian culture and their patrons included not only nobles and churchmen but also the middle classes of these thriving commercial centers Shirley Neilsen Blum offers a new synthesis of this remarkable period in Western art between the refinements of the Gothic and the classicism of the High Renaissance when the mystical was made to seem real In the first part of her text Blum traces the emergence of a new naturalism in the sculpture of Claus Sluter and Donatello and then in the painting of Van Eyck and Masaccio In the second part she compares scenes from the Infancy and Passion of Christ as rendered by artists from North and South Exploring both the images themselves and the theological concepts that lie behind them she re creates as far as possible the experience of the contemporary fifteenth century viewer Abundantly illustrated with color plates of masterworks by Fra Angelico Botticelli Rogier van der Weyden and others this thought provoking volume will appeal equally to general readers and students of art history

*Masaccio* Eliot Wooldridge Rowlands, 2003 Ranked by many scholars as the greatest master of early Italian Renaissance painting Masaccio 1401-1428 was the first artist to use effects of light to create three dimensional images on a two dimensional plane This achievement revolutionary in Masaccio's day is one of the painter's significant contributions to art history This book explores Masaccio's accomplishment as epitomized by the multipaneled painting of which the Saint Andrew panel is thought to have once formed a part the Pisa Altarpiece one of the truly great polyptychs in the history of Italian Renaissance art produced in 1426 for a chapel in the church of Santa Maria del Carmine Pisa The text discusses Masaccio's short life and illustrious career the commission for the altarpiece its patron and program the painting's original location and the role that the church friars played in the actual commission Finally after examining the polyptych's individual panels the book traces their subsequent history and recounts how art historians came to identify them

*Painterly Perspective and Piety* John F. Moffitt, 2014-01-10 While the Renaissance is generally perceived to be a secular movement the majority of large artworks executed in 15th century Italy were from ecclesiastical commissions Because of the nature of primarily basilica plan churches a parishioner's view was directed by the diminishing parallel lines formed by the walls of the structure Appearing to converge upon a mutual point this resulted in an artistic phenomenon known as the vanishing point

As applied to ecclesiastical artwork the Catholic Vanishing Point CVP was deliberately situated upon or aligned with a given object such as the Eucharist wafer or Host the head of Christ or the womb of the Virgin Mary possessing great symbolic significance in Roman liturgy Masaccio's fresco painting of the Trinity circa 1427 in the Florentine church of Santa Maria Novella analyzed in physical and symbolic detail provides the first illustration of a consistently employed linear perspective within an ecclesiastical setting Leonardo's Last Supper Venetian's St Lucy Altarpiece and Tommaso's Transparente illustrate the continuation of this use of liturgical perspective

*A Companion to the Eucharist in the Middle Ages* Ian Levy, Gary Macy, Kristen Van Ausdall, 2011-10-28 The Eucharist in the European Middle Ages was a multimedia event First and foremost it was a drama a pageant a liturgy The setting itself was impressive Stunning artwork adorned massive buildings Underlying and supporting the liturgy the art and the architecture was a carefully constructed theological world of thought and belief Popular beliefs spilling over into the magical celebrated that presence in several tumultuous forms Church law regulated how far such practice might go as well as who was allowed to perform the liturgy and how and when it might be performed This volume presents the medieval Eucharist in all its glory combining introductory essays on the liturgy art theology architecture devotion and theology Contributors include Celia Chazelle Michael Driscoll Edward Foley Stephen Edmund Lahey Lizette Larson Miller Ian Christopher Levy Gerhard Lutz Gary Macy Miri Rubin Elizabeth Saxon Kristen Van Ausdall and Joseph Wawrykow

**Studies on Binocular Vision** Dominique Raynaud, 2016-09-26 This book clarifies the interrelationship between optics vision and perspective before the Classical Age examining binocularity in particular The author shows how binocular vision was one of the key juncture points between the three concepts and readers will see how important it is to understand the approach that scholars once took In the Middle Ages and the Renaissance the concept of *Perspectiva* the Latin word for optics encompassed many areas of enquiry that had been viewed since antiquity as interconnected but which afterwards were separated optics was incorporated into the field of physics i.e. physical and geometrical optics vision came to be regarded as the sum of various psycho-physiological mechanisms involved in the way the eye operates i.e. physiological optics and psychology of vision and the word perspective was reserved for the mathematical representation of the external world i.e. linear perspective The author shows how this division which emerged as a result of the spread of the sciences in classical Europe turns out to be an anachronism if we confront certain facts from the immediately preceding periods It is essential to take into account the way medieval scholars posed the problem which included all facets of the Latin word *perspectiva* when exploring the events of this period This book will appeal to a broad readership from philosophers and historians of science to those working in geometry optics ophthalmology and architecture

*Masaccio's 'Trinity'* Rona Goffen, 1998-01-28 Masaccio's Trinity examines one of the most influential paintings of the Italian Renaissance Renowned for the grandeur of its characterizations and for the perspectival illusion of its architectural setting the fresco was famous from the time it was painted in the 1420s and remembered despite its having been hidden from view for nearly two centuries This
