Rule-based Expert Systems Bruce G. Buchanan, Edward Hance Shortliffe, 1984 Artificial intelligence or AI is largely an experimental science at least as much progress has been made by building and analyzing programs as by examining theoretical questions MYCIN is one of several well know programs that embody some intelligence and provide data on the extent to which intelligent behavior can be programmed As with other AI programs its development was slow and not always in a forward direction The book shares the results of nearly a decade of work the experiments performed and present a coherent picture of the work It presents a critical analysis of several pieces of related research performed by a large number of scientists The whole field of AI will benefit from detailed retrospective examinations of experiments for this is the way the scientific foundations of the field will gradually be defined This is the reason this analysis of the MCYIN experiments is being offered to readers
