Rural Development And Human Fertility:

Rural Development and Human Fertility Wayne A. Schutjer, C. Shannon Stokes, 1984 **Rural Development, Land and Human Fertility**, 1979 Assessing the Demographic Impact of Development Projects A. S. Oberai, 2022-08-30 First published in 1992 Assessing the Demographic Impact of Development Projects based on studies in developing countries focuses on conceptual methodological and policy issues related to development projects It considers whether demographic effects can be assessed and why development planners should be interested in such an assessment A S Oberai examines the extent to which economic and social changes generated by specific development interventions have influenced demographic behaviour in a particular context He suggests how desired effects can be enhanced and undesired effects minimized by policy makers and planners in developing countries in order to deal with problems of population growth and its distribution The major shortcomings of existing methodologies are identified and the author indicates the future direction which research might take in order to be more scientifically valid and useful to policy makers This book is a must read for scholars and researchers of development studies political economy and labour economy **Perspectives on Development and Population Growth in the Third World** O.G. Simmons, 2012-12-06 Until the early to mid 1970s social scientists in the fields of population and development were largely going their own ways Demographers relied almost exclusively on demographic transition theory as their paradigm for understanding the role of development in population change and fertility decline Conversely most development economists and other specialists were certainly aware of the constraints placed upon development objectives by population growth However the main development theories paid little attention to population and the implications of population growth for development Indeed it was not until after the World Population Conference in Bucharest in 1974 that the interaction of population and development became a serious and positive theme for social scientific study Accordingly since about the mid 1970s an extensive literature in the field of population and development has been generated And in 1975 under the auspices of The Population Council the journal Population and Development Review was founded a journal which in the past decade has developed into the premier publication in the world for work in this area But our understanding of development as it refers to change in Third World countries remained fragmented Moreover our understanding of the linkages and interactions between population and development was very limited It is in this regard that Ozzie Simmons's Perspectives on Development and Population Growth in the Third World will certainly have an impact **Gender and the Life Course** Alice S. Rossi, 1985-01-01 Gender and the Life Course is an interdisciplinary collection of essays on the lives of women and men as they are affected by history culture demography economic and political stratification and the biopsychological processes that attend maturation and aging The book covers three major topics Part I which examines gender and the life course in broad historical perspective includes a summary of recent work in biological ecology and primatology and an analysis of the persistence of cultural and gender differences in role organization in societies

undergoing the transition from agrarianism to industrialism Other essays trace the changes in sources of household income of industrial workers over the life span and review temporal and gender differences in life span transitions Part II examines gender differentiation in a variety of contexts psychological psychobiological and sociological Alice Rossi's ASA Presidential Address reviews recent work on fathering and mothering and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences Three essays deal with gender and economy one shows how gender stratification took hold in the early stages of industrialization in France another demonstrates the persistence of gender stratification in modern economies the third focuses on ideology in relation to gender and political power Part III examines various aspects of the aged in contemporary society including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women a review of the methodology used to study changes in the aged population over time and an overview of existing data sets that permit further cohort and longitudinal analyses of the aged The final essays review social policies as they affect the elderly with particular attention to the fact that most very old people are women and the impact of the greatly expanded life course for family and kin relations Gender and the Life Course is a state of the art assessment of the best work currently being done on gender and age a s maturational factors and is essential reading for anyone interested in adult development and gender roles
