Rural Hours:

Rural Hours Susan Fenimore Cooper,1850 **In the Shade of the Pine** Christiana Payne,2026-05-22 In recent years there has been a growing recognition of the importance of trees both as allies in the fight against climate change and as sources of emotional well being In nineteenth century America against a backdrop of accelerating deforestation much like today s writers and artists found emotional solace and symbolic meaning in the woods identifying trees as a civic and spiritual good in need of preservation In the Shade of the Pine Artists Writers and Trees in America 1825 1876 explores the significance of trees in the visual and literary imagination of mid nineteenth century America through the work of seven artists and writers Thomas Cole s explorations of the Catskills Albert Bierstadt s portrayal of the splendid trees of California including the ancient giant sequoias the paintings and drawings of Asher Brown Durand and Frederic Edwin Church the photographs of William James Stillman and the environmental writings of Susan Fenimore Cooper and Henry David Thoreau This richly illustrated volume shows the unique influence the ecology of their land had on the emotional and intellectual landscapes of a generation In their careful study of the woods the beauty of trees their practical importance to human beings and other living creatures and the power of the forest to confer spiritual and emotional benefits these artists and writers laid the groundwork for an ecological consciousness that remains vitally relevant today **Rural Hours** Susan Fenimore Cooper,1998 Rural Hours 1850 is the first piece of nature writing by an American woman The daughter of the novelist James Fenimore Cooper Susan Fenimore Cooper 1813 1894 uses narratives and descriptions of her walks and excursions to reveal her ideal society as a rural one carefully poised between the receding wilderness and a looming industrialization She theorizes that knowledge of place causes people to approach the land humbly and gratefully and asserts the necessity of establishing a society that is sustainable in the natural world and that sees a moral obligation to deepen knowledge of the natural history of the environment This new edition the only printing of the full original text since 1876 restores passages excised by the author for an 1887 edition *Catalog* Kansas State Teachers College of Emporia,1918 **Catalog and Circular** ,1918 **Catalogue** Ohio State University,1914 **Register and Catalogue** Cornell University,1921 The Passage to Cosmos Laura Dassow Walls,2011-11-15 Humboldt offered the world a vision of humans nature as integrated halves of a single whole He espoused the idea that while the universe of nature exists apart from human purpose its beauty order are human achievements Laura Dassow Walls traces the emergence of this philosophy to Humboldt s 1799 journey to America Gendered Ecologies Dewey W. Hall,Jillmarie Murphy,2020-03-18 Gendered Ecologies considers the value of interrelationships that exist among human nonhuman species and inanimate objects featuring observations by women writers as recorded in texts The edition presents a case for transnational women writers participating in the discourse of natural philosophy from the late eighteenth through the early twentieth centuries Susan Fenimore Cooper Rosaly Torna Kurth,2016-08-19 Though primarily recognized as a nineteenth century American nature writer and environmentalist who

significantly influenced Henry David Thoreau Susan Fenimore Cooper 1813 1894 was also an accomplished and productive author in other diverse genres and literary forms including a novel In the first book published that treats all of Susan Fenimore Cooper s known writings preceded by a concise biographical chapter that includes material from Cooper s personal letters Dr Rosaly T Kurth views her literary canon with a wide ranging lens In her compelling study Dr Kurth uniquely incorporates Cooper s philosophy of environmental stewardship on which scholars have thus far focused into an expansive philosophy that includes familial patriotic and humanitarian stewardships thus embracing the human element as well as the environmental Dr Kurth s research on the life and works of Cooper dates back to the early 1970s during which time she discovered nineteen of Cooper s works and as a result in 1977 published the first extensive annotated bibliography of her writings In her engaging book Dr Kurth not only meaningfully and relevantly brings to her work other nineteenth century writers including Thoreau but also nineteenth century women novelists both English and American Dr Kurth also intertwines the results of her lifelong interest in fine art and artistic inclinations as she demonstrates in instances the results of Cooper s remarkable artistic tendencies as manifested in some of her writings Included in this work are Cooper s impassioned series of articles never before treated and with extensive documentation that deal largely with the displacement of the Oneida Indians and their subsequent plight and on related land issues representing in essence the plight of the entire race Comprehensively treated Susan Fenimore Cooper s literary works reveal not only a learned talented cultivated and creative woman writer but also the observant concerned and enlightened mind of a woman expressing herself timelessly on momentous issues not only of man in relation to the natural world around him but of man in relation to his fellow man *Catalog Oregon College of Education, 1929*

Rural Hours (Classic Reprint) Susan Fenimore Cooper, 2016-10-31 Excerpt from Rural Hours
Wednesday 8th Very pleasant day quite spring like The snow is melting fast Spring in the air in the light and in the sky although the earth is yet unconscious of its approach We have weather as mild as this in December but there is something in the fulness and softness of the light beaming in the sky this morning which tells of spring the early dawn before the summer day A little downy woodpecker and a bluejay were running about the apple trees hunting for insects we watched them awhile with interest for few birds are seen here during the winter It is true neither the downy woodpecker nor the jay leaves this part of the county both remain here during the cold weather but they are inactive seldom roving abroad About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Stewardship and the Future of the Planet Rachel Carnell,Chris Mounsey,2022-07-22 This volume examines historical views of stewardship that have sometimes allowed humans to ravage the earth as well as contemporary and futuristic visions of stewardship that will be necessary to achieve pragmatic progress to save life on earth as we know it The idea of stewardship human responsibility to tend the Earth has been central to human cultures throughout history as evident in the Judeo Christian Genesis story of the Garden of Eden and in a diverse range of parallel tales from other traditions around the world Despite such foundational hortatory stories about preserving the earth on which we live humanity in the Anthropocene is nevertheless currently destroying the planet with breathtaking speed Much research on stewardship today in the disciplines of geography urban studies oceans research and green business practice offers insights that should help address the ecological challenges facing the planet Simultaneous scholarship in the humanities and other fields reminds us that the damage done to the planet has often been carried out in the name of tending the land In order to make progress in environmental stewardship scholars must speak to each other across the disciplinary boundaries as they do in this volume
