*Computational Neurology and Psychiatry* Péter Érdi, Basabdata Sen Bhattacharya, Amy L. Cochran, 2017-01-25 This book presents the latest research in computational methods for modeling and simulating brain disorders In particular it shows how mathematical models can be used to study the relationship between a given disorder and the specific brain structure associated with that disorder It also describes the emerging field of computational psychiatry including the study of pathological behavior due to impaired functional connectivity pathophysiological activity and or aberrant decision making Further it discusses the data analysis techniques that will be required to analyze the increasing amount of data being generated about the brain Lastly the book offers some tips on the application of computational models in the field of quantitative systems pharmacology Mainly written for computational scientists eager to discover new application fields for their model this book also benefits neurologists and psychiatrists wanting to learn about new methods

*Institutional Research Initiatives in Higher Education* Nicolas A. Valcik, Jeffrey Alan Johnson, 2017-11-06 American higher education faces a challenging environment Decreasing state appropriations rising costs and tightening budgets have left American colleges and universities scrambling to achieve their missions with ever more limited resources Campus leaders have therefore increasingly relied upon institutional research and strategic planning departments to make transparent and rational decisions and to promote good stewardship of critical but finite resources Institutional Research Initiatives in Higher Education illustrates the wealth of institutional research activities occurring in American higher education Featuring

chapters by a prominent mix of authors representing community colleges traditional undergraduate institutions land grant institutions research and flagship universities and state agencies this book provides numerous insights into the contemporary challenges innovative programs and best practices in institutional research With contributors from a variety of regions and types of institutions each chapter provides rigorous analysis of campus based research activities in areas such as strategic planning admissions and enrollment management assessment and compliance and financial planning and budgeting Like the departments it studies Institutional Research Initiatives in Higher Education is an invaluable resource for university administrators researchers and policymakers alike
