Multilateral Development Banking:

The Multilateral Development Banks Barbara Upton, 2000-03-30 Upton examines the U S policy process toward the five multilateral development banks the World Bank Group the Inter American Development Bank the Asian Development Bank the African Development Bank and the European Bank for Reconstruction and Development as a case study in how the United States manages its participation in multilateral institutions The management of the U S role in these institutions is significant primarily because these institutions play an increasingly important role in the U S relationship with the developing world and because for the most part they are mature institutions being called upon to adapt their roles and operating styles to new financial and political realities After examining the evolving role of the MDBs from the U S perspective Upton describes the U S policy process toward the banks and assesses its strengths and weaknesses She then sets out recommendations for improving the process and looks at the broader more general lessons for U S policy formulation on multilateral institutions An important assessment for scholars researchers and policy makers involved with international relations and economic policy

Mobilization Effects of Multilateral Development Banks Chiara Broccolini,Giulia Lotti,Alessandro Maffioli,Mr.Andrea F Presbitero,Rodolfo Stucchi,2019-02-15 We use loan level data on syndicated lending to a large sample of developing countries between 1993 and 2017 to estimate the mobilization effects of multilateral development banks MDBs controlling for a large set of fixed effects We find evidence of positive and significant direct and indirect mobilization effects of multilateral lending on the number of deals and on the total size of bank inflows The number of lending banks and the average maturity of syndicated loans also increase after MDB lending These effects are present not only on impact but they last up to three years and are not offset by a decline in bond financing There is no evidence of anticipation effects and the results are not driven by confounding factors such as the presence of large global banks Chinese lending and aid flows Finally the economic effects are sizable suggesting that MBDs can play a vital role to mobilize private sector financing to achieve the goals of the 2030 Development Agenda
