Murder Masculinity:

When Men Kill Kenneth Polk, 1994-11-25 Important policy issues regarding the role of gender and class in homicide are raised by descriptions of various patterns of crimes committed exclusively by males Case studies of four specific scenarios of violence supplement this qualitative statistical analysis

Murder and Masculinity Rebecca E. Biron, 2000 Rebecca Biron breaks new ground in this study of masculinity violence and the strategic construction of collective political identities in twentieth century Latin American fiction By engaging current sociological psychoanalytic and feminist theories *Murder and Masculinity* analyzes the cliché of proving virility through violence against women Biron develops her argument through close readings of five works Jorge Luis Borges's *La intrusa* Armonía Somers's *El despojo* Clarice Lispector's *A Maca no Escuro* Manuel Puig's *The Buenos Aires Affair* and Reinaldo Arenas's *El Asalto* Although men murdering women is often interpreted as nothing more than machista misogyny Biron argues that the five narratives addressed in this book show that healed masculinities are essential to the achievement of cultural identity and political autonomy in Latin America The introduction to this study deftly situates Biron's work in relation to previous theoretical arguments on the social and political dimensions of Latin American writing The five subsequent chapters offer superb analyses of the individual texts Like their male protagonists who experiment with the psychological and legal extremes of gender division these narratives risk nonconformity to the laws of genre in their quest for liberation from violent social and literary conventions In combining elements of detective stories crime narratives psychological case studies and magical or grotesque realism they offer metafictional commentary on a network of discourses that confuses images of masculinity national identity and political autonomy in postcolonial Latin America

Interconnecting the Violences of Men Kate Seymour, Bob Pease, Sofia Strid, Jeff Hearn, 2024-11-04 This book aims to expand and enrich understandings of violences by focusing on gendered continuities interconnections and intersections across multiple forms and manifestations of men's violence In actively countering both the compartmentalisation of studies of violence by type and form and the tendency to conceptualise violence narrowly it aims to flesh out not delimit understandings of violence Bringing together cross disciplinary indeed transdisciplinary perspectives this book addresses how what are often seen as specific and separate violences connect closely and intricately with wider understandings of violence how there are gendered continuities between violences and how gendered violences take many forms and manifestations and are themselves intersectional Grounded by the recognition that violence is itself a form of inequality the contributors to this volume traverse the intersectional complexities across both experiences of violent inequality and what is seen to count as violence The international scope of this book will be of interest to students and academics across many fields including sociology criminology psychology social work politics gender studies child and youth studies military and peace studies environmental studies and colonial studies as well as practitioners activists and policymakers engaged in violence prevention

Critical Mass Dinur Blum, Christian Jaworski, 2021-09-27 This book

examines social patterns in 2 000 mass shootings in the United States between 2013 through 2020 While mass shootings are often described as psychological the authors show that there are social factors that produce the anger needed to commit a mass shooting These factors are fairly common and can be addressed to stem the anger earlier The factors include chronic poverty sudden unemployment relationship problems domestic violence social isolation and alcohol Common social strains can metastasize and be lethally dangerous By understanding the social factors we can reduce the anger and frustration people feel that would drive them to killing others

Crime and Society Donna Youngs,2019-07-09 Much of a society's resources are devoted to dealing with or preparing for the possibility of crime The dominance of concerns about crime also hint at the broader implications that offending has for many different facets of society They suggest that rather than being an outlawed subset of social activity crime is an integrated aspect of societal processes This book reviews some of the direct and indirect social impacts of criminality proposing that this is worthwhile not just in terms of understanding crime but also because of how it elucidates more general social considerations A range of studies that examine the interactions between crime and society are brought together drawing on a wide range of countries and cultures including India Israel Nigeria Turkey and the USA as well as the UK and Ireland They include contributions from many different social science disciplines which taken together demonstrate that the implicit and direct impact of crime is very widespread indeed The chapters in this book were originally published as a special issue of Contemporary Social Science

Hatred, Murder and Male Honour Stephen Tomsen,2002 Based on evidence from a study of 74 anti homosexual homicides with male victims that occurred in New South Wales between 1980 and 2000 this report analyses the social characteristics of victims and perpetrators and the situational factors involved as well as case studies outlining specific homicide scenarios The study also examines the links between such killings and commonplace issues of male identity The link to various aspects of masculinity including heterosexism and male honour that have community support leads to a critical scrutiny of the legal issues involved including the homosexual advance defence and the idea of homosexual panic as a legal defence

Criminology in Brief Robert Heiner,2020-11-16 This book offers a short and accessible introduction to criminology Written in a clear and direct style

criminological theories are made more accessible for undergraduates and the workings of the criminal justice system are explained. Students will learn not only how the criminal justice system works but also how it does not work. Beyond introducing students to the basics, the book provides a persuasive argument that the criminal justice system we have in the United States comes nowhere close to our ideals for justice, doing little good in terms of crime control while doing great harm to minorities and the poor. Engaging and far-ranging, this text offers a condensed approach to the key themes and debates surrounding crime and justice and covers definitions and measurements of crime, criminological theories, crime typologies, and contemporary issues in the criminal justice system. It includes chapters on Criminological Methods and Data, Biological, Psychological, and Classical Theories of Crime, Sociological Theories of Crime, Patterns of Crime, The Police, The Courts, Corrections, and the American Prison System. Written by an experienced textbook author, this book offers a critical approach to the subjects discussed and draws on topical examples such as Black Lives Matter, the militarization of the police, plea bargaining, and the War on Drugs. It is essential reading for Criminology courses within a Sociology Major and will also be of interest to Criminal Justice majors, law students, policymakers, and informed citizens.

Men and Masculinity Theodore F. Cohen, 2000. Illustrating how men's experiences are shaped by cultural notions of masculinity and structural realities of gender, this text includes articles from academic journals, books, interviews, and personal narratives. The Routledge International Handbook on Femicide and Feminicide Myrna Dawson, Saide Mobayed Vega, 2023-05-31. This volume explores in depth femicide and feminicide, bringing together our current knowledge on this phenomenon and its prevention. No country is free from femicide and feminicide, which represents the tip of the iceberg in male violence against women and girls. Therefore, it is crucial and timely to better understand how states and their citizens are experiencing and responding to femicide and feminicide globally. Through the work of internationally recognized feminist and grassroots activists, researchers, and academics from around the world, this handbook offers the first in-depth global examination of the growing social movement to address femicide and feminicide. It includes the current state of knowledge and the prevalence of femicide and feminicide and its characteristics across countries and world regions, as well as the social and legal responses to these killings. The contributions contained here look at the accomplishments of the past four decades, ongoing challenges, and current and future priorities to identify where we need to go from here to prevent femicide and feminicide specifically and male violence against women and girls overall. This transnational, multidisciplinary, cross-sectoral handbook will contribute to research, policy, and practice globally at a time when it is needed the most. It brings a visible global focus to the growing concern about femicide and feminicide, underscoring the importance of adopting a human rights framework in working towards its prevention in an increasingly unstable global world for women and girls.

Transfigurations Asbjørn Grønstad, 2008 In many senses viewers have cut their teeth on the violence in American cinema from Anthony Perkins slashing Janet Leigh in the most infamous of shower scenes to the 1970s masterpieces of Martin Scorsese Sam Peckinpah and Francis Ford Coppola to our present day undertakings in imagining global annihilations through terrorism war and alien grudges *Transfigurations* brings our cultural obsession with film violence into a renewed dialogue with contemporary theory Grønstad argues that the use of violence in Hollywood films should be understood semiotically rather than viewed realistically *Transfigurations* thus alters both our methodology of reading violence in films and the meanings we assign to them depicting violence not as a self contained incident but as a convoluted network of our own cultural ideologies and beliefs

Paper Money Men David Anthony, 2009 *Paper Money Men* Commerce Manhood and the Sensational Public Sphere in Antebellum America by David Anthony outlines the emergence of a sensational public sphere in antebellum America It argues that this new representational space reflected and helped shape the intricate relationship between commerce and masculine sensibility in a period of dramatic economic upheaval Looking at a variety of sensational media from penny press newspapers and pulpy dime novels to the work of well known writers such as Irving Hawthorne and Melville this book counters the common critical notion that the period's sensationalism addressed a primarily working class audience Instead *Paper Money Men* shows how a wide variety of sensational media was in fact aimed principally at an emergent class of young professional men *Paper money men* were caught in the transition from an older and more stable mercantilist economy to a panic prone economic system centered on credit and speculation And Anthony argues they found themselves reflected in the sensational public sphere a fantasy space in which new models of professional manhood were repeatedly staged and negotiated Compensatory in nature these alternative models of manhood rejected fiscal security and property as markers of a stable selfhood looking instead toward intangible factors such as emotion and race in an effort to forge a secure sense of manhood in an age of intense uncertainty

Black Manhood on the Silent Screen Gerald R. Butters, 2002 In early twentieth

century motion picture houses offensive stereotypes of African Americans were as predictable as they were prevalent Watermelon eating chicken thievery savages with uncontrollable appetites Sambo and Zip Coon were all representations associated with African American people Most of these caricatures were rendered by whites in blackface Few people realize that from 1915 through 1929 a number of African American film directors worked diligently to counter such racist definitions of black manhood found in films like D W Griffith s *The Birth of a Nation* the 1915 epic that glorified the Ku Klux Klan In the wake of the film s phenomenal success African American filmmakers sought to defend and redefine black manhood through motion pictures Gerald Butters s comprehensive study of the African American cinematic vision in silent film concentrates on works largely ignored by most contemporary film scholars African American produced and directed films and white independent productions of all black features Using these race movies to explore the construction of masculine identity and the use of race in popular culture he separates cinematic myth from historical reality the myth of the Euro American controlled cinematic portrayal of black men versus the actual black male experience Through intense archival research Butters reconstructs many lost films expanding the discussion of race and representation beyond the debate about good and bad imagery to explore the construction of masculine identity and the use of race as device in the context of Western popular culture He particularly examines the filmmaking of Oscar Micheaux the most prolific and controversial of all African American silent film directors and creator of the recently rediscovered *Within Our Gates* the legendary film that exposed a virtual litany of white abuses toward blacks *Black Manhood on the Silent Screen* is unique in that it takes contemporary and original film theory applies it to the distinctive body of African American independent films in the silent era and relates the meaning of these films to larger political social and intellectual events in American society By showing how both white and black men have defined their own sense of manhood through cinema it examines the intersection of race and gender in the movies and offers a deft interweaving of film theory American history and film history *Murder American Style* Alex Alvarez, Ronet Bachman, 2003 A part of the Wadsworth Contemporary Issues in Crime and Justice Series this text is one of a few to exclusively address the core issues that relate to criminal homicide in the United States *MURDER AMERICAN STYLE* provides an interdisciplinary theoretical approach to understanding the patterns and trends of lethal violence in America
