Salin, 2012-12-06 Pascal Salin Many of the texts which have been used for the present book were presented as papers at a conference organized in Brussels by Michiel van Notten for the 1 Institutum Europaeum in December 1980 on the subject of European Monetary Union and Currency Competition However this book is more than the mere proceedings of a conference It aims at presenting the reader with an homogenous text not a patchwork of papers in spite of the large number of contributors Though it would be absurd to pretend that these contributors some of whom are prominent thinkers agree on everything their dissenting opinions do not go beyond the usual qualifications one may find in a book of which the final direction is quite clear but where the requirement of intellectual strictness leads to the analysis of both the pros and the cons of a problem It may also seem to some that this book deals with two different subjects currency competition and monetary union which have been joined together more or less randomly We believe however that this impression will be dispelled as soon as they commence reading Both sections of the book deal with one and the same topic the optimal organization of a monetary system Present efforts to achieve European monetary unification all suffer from the same prejudices with respect to the organization of the monetary systems within each country and within the world as a whole Liberty Through Gold ,
