Overcoming Stagnation In Aiddependent Countries:

Overcoming Stagnation in Aid-dependent Countries Nicolas Van de Walle,2005 For 50 years foreign aid has been the central policy instrument with which the international community has promoted economic development The main justification for aid has always been that the poorest countries could not develop without it But does Foreign aid work This book argues that large new infusions of foreign aid will largely be wasted unless the current agenda of reform is pushed forward much more aggressively It offers a concrete a set of proposals for the international community to promote economic development

Overcoming Stagnation in Aid-Dependent Countries - Brief ,2005 Traditional economic theory predicts that capital mobility and international trade will push the world s national economies to one income level As poorer nations race ahead richer ones should slow down Eventually theory says national economies would reach equilibrium The reality of the last few decades however defies this notion most of the poorest economies continue to lag far behind For 50 years foreign aid has been the main way the international community has promoted economic development Yet it has not proven to be a silver bullet

Overcoming Stagnation in Aid-dependent Countries Nicolas Van de Walle,2005 In this book Nicolas Van de Walle identifies 26 countries that are extremely poor and grew little if at all in the 1990s His sample excludes North Korea and countries where civil war explains some of their failure to grow Afghanistan Sierra Leone Sudan Tajikistan and others The 26 countries have limited infrastructure and human capital and the small size of their markets deter private savings and investment Aid was meant to help overcome these problems and these countries received a lot Yet they have failed to grow What is wrong Is foreign aid a solution or part of the problem What changes might make aid more effective Given these countries require the financial and technical resources of the West why haven t aid programs made a difference Van de Walle blames their economic failure mostly on the venality and incompetence of their political leadership He analyzes the contradictions and tensions faced by the aid community in poorly run countries providing a sobering analysis of the perverse effects of aid where the politics is all wrong Too often resources provided by foreign aid keep the wrong government in office and undermine adoption of economic as well as political reforms Bad government combined with aid in short hurts poor countries and particularly the poorest people in those countries Despite good intentions little progress has been made in implementing announced reforms of the aid business itself A constituency for reform is lacking in the donor countries and in the recipient countries where those in power benefit from the status quo

Foreign Aid and the Future of Africa Kenneth Kalu,2018-05-22 During the past five decades sub Saharan Africa has received more foreign aid than has any other region of the world and yet poverty remains endemic throughout the region As Kenneth Kalu argues this does not mean that foreign aid has failed rather it means that foreign aid in its current form does not have the capacity to procure development or eradicate poverty This is because since colonialism the average African state has remained an instrument of exploitation and economic and political institutions continue to block a majority of citizens from meaningful participation in

the economy Drawing upon case studies of Angola Cameroon Chad Equatorial Guinea Democratic Republic of the Congo and Nigeria this book makes the case for redesigning development assistance in order to strike at the root of poverty and transform the African state and its institutions into agents of development Development Without Aid David A. Phillips,2013-04-01 Development Without Aid opens up perspectives about foreign aid to the world s poorest countries Growing up in Malawi the author developed a sense of the limitations of foreign assistance and from this evolves a critique of foreign aid as an alien resource unable to provide the dynamism that could propel the poorest countries out of poverty The book aims to help move the discussion beyond foreign aid It examines the rapid growth of the world s diasporas as a quasi indigenous resource of increasing strength in terms of both financial and human capital and considers how far such a resource might supersede aid It uses extensive research findings to explore the possibilities for a resumption of sovereignty by poor states especially in Africa over their own development with the assistance of the world s diasporas China Returns to Africa Chris Alden,Daniel Large,Ricardo Soares de Oliveira,2008 The geopolitical landscape of China Africa relations has been overlooked during the G8 s purported Year of Africa which generated debate in the build up to the China Africa Summit in Beijing in 2006 This book offers surveys of China s return to Africa examining what this relationship holds for diplomacy trade and development Reinventing Foreign Aid William Easterly,2008 Discusses how to improve the effectiveness of foreign aid proposing practical solutions to specific problems rather than a utopian master plan This work also includes writers who look at scientific evaluation of aid projects and describe projects found to be cost effective including vaccine delivery and HIV education Smart Aid for African Development Richard A. Joseph,Alexandra Gillies,2009 Despite hundreds of billions of dollars spent on foreign aid to sub Saharan Africa a sure path to growth and development has not yet been found and each new heralded approach has crumbled amid regrets and recriminations The authors of Smart Aid for African Development provide critical assessments of the main components of foreign assistance considering how smarter use can be made of available resources to advance growth and democracy rebuild war torn societies and reduce the crippling poverty that underlies many of the continent s fierce conflicts A critical assessment of the main components of foreign aid to sub Saharan Africa considering how smarter use can be made of available resources to advance growth and democracy rebuild war torn societies and reduce the crippling poverty that pervades the continent **Resolved, that the United States federal government should substantially increase its public health assistance to Sub-Saharan Africa** ,2007 Papers and Proceedings of the Annual Meeting American Economic Association,2007 Does Foreign Aid Really Work?
