The Book of the Holy Light Michael Levey, Michael Levi, 2004 LISTEN TO ITS RHYTHMS WITH AN OPEN HEART The Book of the Holy Light reveals the nature of God in the form of the Son of God The first chapter The Testament of the Holy Light of God opens the framework of existence in the body of God revealing the nature of light in the embrace of unity The book continues with The Testament of the Son of God inviting the children of light to return home to the inner space of God The next chapter The Twelve Transformations of the Holy Light of God awakens the inner transformations of consciousness transmuting the children of light into the body of God Next The Trans portal Matrix of Divine Grace describes the inter connecting matrix of consciousness binding the children of light in the body of God The book continues with The Dimensions of Light opening the multi dimensional universe to the children of God The next chapter The Forms of Ascending Light triggers the mechanisms of ascension in the consciousness of the child of light Finally The Circle of Ascending Light weaves a tapestry of light around the children of God connecting them to the body of God This is the story of light told through revelation To appreciate it fully you must set aside your intellect and like poetry listen to its rhythms with an open heart Tony Ellis award winning poet and author of There is Wisdom in Walnuts

Personal Immortality by Automatic All-Natural Processes Everett Cheney, 2010 This all naturalistic book is offered in response to a growing worldwide need for a new comprehensive alternative to Supernaturalistic Theism Modern learning and recent religion inspired human world savagery have turned off more people than ever before from the many traditional Supernaturalistic Theistic Religions Worldwide more than a billion people already share all naturalistic world views and values but many lack an adequate chart to help navigate the rough and uncertain waters of personal living existence This book is an effort to provide information to help the interested naturalistic reader formulate such a chart and in the process also explain how and why everyone automatically and unconditionally lives forever by forever ongoing all natural processes The concept of all things by natural processes that is described and explained in this book could give some people a whole new understanding of Reality and change their lives for the better in important ways And it might also inspire some people to more fully and enthusiastically participate in the celebration of life and when their end times near help them make their final peace with the darkness

Entropic Creation Helge S. Kragh, 2016-04-29 Entropic Creation is the first English language book to consider the cultural and religious responses to the second law of thermodynamics from around 1860 to 1920 According to the second law of thermodynamics as formulated by the German physicist Rudolf Clausius the entropy of any closed system will inevitably increase in time meaning that the system will decay and eventually end in a dead state of equilibrium Application of the law to the entire universe first proposed in the 1850s led to the prediction of a future heat death where all life has ceased and all organization dissolved In the late 1860s it was pointed out that as a consequence of the heat death scenario the universe can have existed only for a finite period of time According to the entropic creation argument thermodynamics warrants the conclusion that the

world once begun or was created It is these two scenarios allegedly consequences of the science of thermodynamics which form the core of this book The heat death and the claim of cosmic creation were widely discussed in the period 1870 to 1920 with participants in the debate including European scientists intellectuals and social critics among them the physicist William Thomson and the communist thinker Friedrich Engels One reason for the passion of the debate was that some authors used the law of entropy increase to argue for a divine creation of the world Consequently the second law of thermodynamics became highly controversial In Germany in particular materialists and positivists engaged in battle with Christian mostly Catholic scholars over the cosmological consequences of thermodynamics This heated debate which is today largely forgotten is reconstructed and examined in detail in this book bringing into focus key themes on the interactions between cosmology physics religion and ideology and the public way in which these topics were discussed in the latter half of the nineteenth and the first years of the twentieth century

Beyond Words, Things, Thoughts, Feelings Ha Poong Kim,2011 What is the nature of aesthetic experience Ha Poong Kim suggests that a genuine aesthetic experience is a perceptual state of consciousness free of thought He characterises it as subjectless objectless timeless revelatory and joyous It is a state of mind thus markedly different from our everyday experience where thought processes impinge randomly on our consciousness The seven essays are divided to three parts Part I tackles the nature of aesthetic experience as opposed to everyday perception and attempts to illuminate the experience of the beautiful by discussing Plato s famous allegory of the charioteer in Phaedrus and an episode in Proust s *In the Shadow of Young Girls in Flower* the second section of *In Search of Lost Time* Part II takes a critical look at Kant s treatment of the judgement of taste in his *Critique of Judgement* and Eduard Hanslick s conception of the imagination Part III details Kim s thoughts on several topics of the current debate in aesthetics among them on the difference between aesthetic and intellectual pleasure and the nature of expressiveness of music In the first of the two essays in Part III the author discusses critically Christopher Butler s interpretation of artworks as narrative and in the second Peter Kivy s theory of expressive properties Two appendices are provided one on the alienation of aesthetic experience in the common love of artworks as values and the other on performance art as an art form especially in view of the recent retrospective of Marina Abramovic MoMA New York In this appendix the author presents a critique of today s prevailing conception of art
