Mmr Science And Fiction:

MMR Richard C. Horton,2004 The publication of Andrew Wakefield s work in The Lancet in 1998 inadvertently triggered a collapse of public confidence in the MMR vaccine Six years into this health crisis a key and much disputed part of the report was retracted Now The Lancet s editor Dr Richard Horton considers the implications of this affair Horton is an advocate of the MMR his own child has had the triple vaccine and here he gives an insider s account of the events surrounding this controversy He reviews the history of the MMR vaccine and the claims about its safety discussing why we consistently fail to debate controversial science rationally He analyses the malign influence of financial conflicts of interest in medical research today and looks at what might be done to improve our present understanding of autism He examines prospects for completely eradicating measles from the world a disease which kills 700 000 children each year [Health, Risk and News](#) Tammy Boyce,2007 The controversy surrounding the measles mumps and rubella MMR vaccine and autism has raised unprecedented questions about the communication of health and science Health Risk and News The MMR Vaccine and the Media examines how this story came to be so influential and asks if the media are to blame for unduly panicking the public Drawing on comprehensive research on media coverage interviews with a range of journalists and sources and analysis of audience opinion this book explores how medical controversies are covered with attention to issues of balance and objectivity expertise news values risk and media effects It will be of interest to students and scholars of media studies journalists and health professionals **Vaccinating Britain** Gareth Millward,2019-01-29 Vaccinating Britain shows how the British public has played a central role in the development of vaccination policy since the Second World War It explores the relationship between the public and public health through five key vaccines diphtheria smallpox poliomyelitis whooping cough and measles mumps rubella MMR It reveals that while the British public has embraced vaccination as a safe effective and cost efficient form of preventative medicine demand for vaccination and trust in the authorities that provide it has ebbed and flowed according to historical circumstances It is the first book to offer a long term perspective on vaccination across different vaccine types This history provides context for students and researchers interested in present day controversies surrounding public health immunisation programmes Historians of the post war British welfare state will find valuable insight into changing public attitudes towards institutions of government and vice versa An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence **New Methodological Perspectives on Observation and Experimentation in Science** Wenceslao J. González,2010-12-29 Observation and experimentation are central topics of philosophy and methodology of science The empirical sciences have commonly been associated to observational and experimental processes because they have been considered crucial for testing the contents of these Thus observation and experimentation have received attention from different angles and they have been historically relevant in the advancement of science Their philosophical methodological analysis includes some key aspects those related to axiological epistemological

and methodological issues New Methodological Perspectives on Observation and Experimentation in Science deals with a classic topic that is seen from new angles Its nine chapters seek non traditional aspects trying to extend the boundaries of this philosophical methodological theme They are presented in five sections 1 A Philosophical Methodological Context 2 Experience and Scientific Observations 3 Empirical Support and Experiments in Science 4 Changes in the Framework on Observation and Experimentation and 5 Enlarging the Philosophical Scope Law and Ecology Wenceslao J Gonzalez is Professor of Logic and Philosophy of Science University of A Coru a He is a Full Member of the International Academy for Philosophy of Sciences AIPS Visiting fellow at the Center for Philosophy of Science University of Pittsburgh and a Team Leader of the European Science Foundation program entitled The Philosophy of Science in a European Perspective He has been named a Distinguished Researcher by the Main National University of San Marcos in Lima Peru He has been a visiting researcher at the Universities of St Andrews M nster and London LSE He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologna Canterbury NZ and Beijing He has edited 26 volumes on philosophy and methodology of science

Trusting Science Kostas Kampourakis,2025 Certain scientific fields have long been battlegrounds of controversy echoing a deep seated public distrust towards science This distrust is especially pronounced in areas of policy science that is science that informs policy decisions such as vaccination programs This book explores the roots of this distrust setting it apart from outright denial of science While absolute denial is rare distrust can be quite widespread often nourished by personal experiences or the persuasive testimonies of others Trusting Science embarks on a journey to uncover some underexplored causes of science distrust It thus underscores the necessity of demystifying science by illuminating the nature of scientific evidence the inevitable presence of uncertainty the indispensable role of expertise and the subtle sway of personal biases Drawing on historical examples from vaccination and other life sciences Trusting Science offers opportunities for reflection about how science is done and argues that a renaissance in science education and communication is crucial for cultivating realistic expectations and rebuilding public trust in science

The Law-Science Chasm Cedric Charles Gilson,2012-11-01 THE LAW SCIENCE CHASM is a socio legal study that takes seriously the varying approaches to science that physicians and scientists use as compared to legal actors such as judges and lawyers Offering a way to mediate and translate their different perspectives and assumptions Gilson uses sociological and philosophical methodologies to explain each discipline to the other Gilson s book takes seriously the idea of the autopoietic closure of society s communicative subsystems and works out the consequences in particular for science and law This analysis both lends support to the credibility of the approach adopted and sheds light on the problems and the direction in which potential solutions might lie The book consequently makes an important contribution not only to the literature dealing with the relationship between science and law but also to the literature dealing with the application of autopoietic systems theory to tangible concerns This

book is therefore of clear significance to those continuing to wrestle with the challenges thrown up by science for law and policy even when the spotlight of public attention is directed elsewhere JOHN PATERSON Professor of Law University of Aberdeen from the Foreword Part of the new Dissertation Series from Quid Pro Books **New Scientist and Science Journal** ,2004 *New Scientist* ,2004 **Science and the Old Testament** Trent Dee Stephens,2026-02-26 By Trent Dee Stephens For anyone who s ever sat in a science class and wondered how it fits with the scriptures or questioned whether their faith could survive honest inquiry Science and the Old Testament offers a refreshing and faithful perspective Latter day Saint scientist Trent Dee Stephens PhD combines a lifetime of academic expertise with deep gospel conviction to examine the Bible s most remarkable stories through a scientific lens From the Creation and the Flood to ancient genetics and cosmology Stephens explores how revelation and reason can coexist without compromise He doesn t shy away from tough questions Instead he embraces them showing how inspired prophets may have recorded divine truths filtered through their own understanding culture and time You ll come away with greater faith not less because you ll see that both scripture and science point toward the same God In this book you ll discover How to navigate doubts about the Bible in light of modern science Why understanding context helps clarify what scripture is and isn t trying to say What current science reveals about ancient events How spiritual belief can thrive alongside intellectual honesty Science and the Old Testament is the bridge between the faith you love and the questions you ve been asking *Why Democracies Need Science* Harry Collins,Robert Evans,2017-03-27 We live in times of increasing public distrust of the main institutions of modern society Experts including scientists are suspected of working to hidden agendas or serving vested interests The solution is usually seen as more public scrutiny and more control by democratic institutions experts must be subservient to social and political life In this book Harry Collins and Robert Evans take a radically different view They argue that rather than democracies needing to be protected from science democratic societies need to learn how to value science in this new age of uncertainty By emphasizing that science is a moral enterprise guided by values that should matter to all they show how science can support democracy without destroying it and propose a new institution The Owls that can mediate between science and society and improve technological decision making for the benefit of all Contemporary Science Fiction and The Many-Worlds Interpretation of Quantum Mechanics Jonathan P. Lewis,2025-10-02 This book seeks to create a new means of interrogating the direction in which contemporary science fiction is progressing **Big Pharma** Jacky Law,2006 Pharmaceutical medicine is very very big business The top ten players earned more than 200 billion in 2003 One drug Pfizer s cholesterol pill Lipitor had sales of more than 9 billion This kind of money buys an awful lot of friends among doctors and politicians Most of those involved in the formulation of public health policy seems happy with the present system The trouble is that the public is starting to have doubts There is a growing sense that the vast profits of drug companies and their control of the research agenda might not be that good for our health Jacky Law takes the reader on a journey through the pharmaceutical business and shows how the

public is quite right to be concerned about conventional medicine as it has developed since the late 1970s She tells a story of spectacular regulatory failure phenomenally high prices betrayal of the public interest and a growing awareness among ordinary people that things could be very different Sophisticated marketing and public relations not scientific excellence have helped corporations to preside unchallenged over matters of life and death It is time Law argues for us to take responsibility for our health not as passive consumers of pharmaceutical medicine but as informed citizens *Tribune for Victory and Socialism*, 2004 **International Who's Who of Authors and Writers 2008** Europa Publications, 2007-08-23 An invaluable source of information on the personalities and organizations of the literary world Communication in the Age of Suspicion Vian Bakir, David M.
