Young people, education, and sustainable development Peter Blaze Corcoran, Philip M. Osano, 2023-09-04 Young people have an enormous stake in the present and future state of Earth Almost half of the human population is under the age of 25 If young people's resources of energy time and knowledge are misdirected towards violence terrorism socially isolating technologies and unsustainable consumption civilization risks destabilization Yet there is a powerful opportunity for society if young people can participate positively in all aspects of sustainable development In order to do so young people need education political support resources skills and hope This volume offers a global perspective on education initiatives by and for young people that promote a transition to sustainability It includes 38 essays co authored by 68 contributors from 25 nations representing a diversity of geography gender and generation The development of youth leadership has been a central concern of my professional work Young people have a lot to offer to sustainable development and should participate in planning for our planet's future This rich collection of theoretical and practical approaches captures the growing response of young people to this challenge I am particularly pleased with the attention paid to the role of often underrepresented regions of the world to the role of women and to the Earth Charter in the creating of a peaceful and sustainable future Julia Marton Lefvre Director General of IUCN International Union for Conservation of Nature and former Rector of the University for Peace This book is a rich global tapestry depicting the inter linkages among youth education and sustainable development
