

# Writing a Scientific Explanation

**Claim:** The answer or conclusion to the scientific question.

*For example: The Yankees are the best team in Major League Baseball.*

**Evidence:** Scientific data that supports the claim.

*For example: The Yankees have won the World Series more than any other team in history.*

**Reasoning:** Explains why the evidence supports the claim, providing a logical connection between the evidence and the claim.

*For example: The World Series is a championship to determine who is the best team in the major leagues. Because the Yankees have won this championship more times than any other team, they are the best team in Major League Baseball.*
