Strengthening Southern-Driven Cooperation as a Catalyst for ICT4D Petter Nielsen, Honest Christopher Kimaro, 2019-04-25
The two volumes IFIP AICT 551 and 552 constitute the refereed proceedings of the 15th IFIP WG 9.4 International Conference on Social Implications of Computers in Developing Countries ICT4D 2019 held in Dar es Salaam Tanzania in May 2019. The 97 revised full papers and 2 short papers presented were carefully reviewed and selected from 185 submissions. The papers present a wide range of perspectives and disciplines including but not limited to public administration, entrepreneurship, business administration, information technology for development, information management systems, organization studies, philosophy and management. They are organized in the following topical sections: communities, ICT enabled networks and development, digital platforms for development, ICT for displaced population and refugees, How it helps, How it hurts, ICT4D for the indigenous by the indigenous and of the indigenous, local technical papers pushing the boundaries, new research methods, theory and philosophy in ICT4D, southern driven, human computer interaction, sustainable ICT, informatics, education and learning in a turbulent world, doing the safari way. **Mass Media in 2025** Erwin K. Thomas, Brown H. Carpenter, 2001-08-30. The future of mass media may appear unpredictable and too complex to fathom, but *Mass Media in 2025* takes a scholarly theoretical approach to identifying trends and explaining their possibilities. Noted contributors approach a variety of media with a solid grounding in the history of each and an eye for which may be vulnerable and which may thrive in the new technological age. Trends such as interactivity and niche building will affect everything from the newspaper to public relations, and this collection of essays provides a fascinating guide to where the next decades may take us. Regardless of the visual, aural, or printed form, *Mass Media in 2025* illustrates the degree to which older media will have to incorporate the level of interaction and specialization offered by newer media if they are to survive. These effects can already be seen in the proliferation of television channels, in the ironic bent of advertising, in the rise of infotainment, in news organizations. This book shows not only how all of this has come to be, but also more importantly where it will go. *New Communications Technology* J. Macgregor Wise, 1993. Use of New Communication Technologies in Third World Countries: a Comparison of Perspectives Lai Si Tsui, 1990. *Information Technology, Development, and Social Change* Fay Patel, Prahalad Sooknandan, Giselle Rampersad, Anuradha Mundkur, 2012-05-31. The speed and cost effectiveness of new information technology has prompted many to view these innovations as a panacea for social and economic development. However, such a view flies in the face of continuing inequities in education, health, food, and infrastructure. This volume explores these issues along with questions of access, privilege, literacy, training, and the environmental and health effects of information technologies in the developing world, arguing that a higher level of development does not always result from a higher level of technologization. **New Communication Technologies** Josiane Jouët, Sylvie Coudray, 1991. This report presents a synoptic view of the research on the subject of new information technologies that has been supported by Unesco and of research conducted outside Unesco's program. The report attempts to single out the main findings of this body

of research and to identify new avenues of investigation and action that may be able to contribute to the growth of the research effort An interdisciplinary approach is taken to the main problem areas in new communication technologies and the issues discussed range over the fields of economics law culture sociology and education The report is divided into eight chapters 1 Unesco s Activities in the Research Field 2 Research on New Communication Technologies The State of the Art 3 The Explosion of Information Production audiovisual communication telematics and computer networks 4 The New Legal and Political Issues legal and institutional dimensions computer and video piracy and the law and the concept of information 5 The Cultural Issues Involved in the New Communication Technologies cultural imperialism emergence of new forms of culture and cultural assimilation of new technologies 6 The New Technologies in Education media education informatics and education and new distance education technologies 7 The Social Aspects of the New Technologies and 8 The Interaction between Technology and Society A two part bibliography lists 45 Unesco studies on information technology and a general section lists more than 250 items A list of research and Comnet centers concludes the report DB Information and Communication Technologies in the Context of Globalization K. Lal,2007-11-13 This book focuses on the adoption of new technologies led by information and communication technologies by SMEs in developing countries It identifies several factors that augment competitiveness of firms in the era of globalization Contrary to the general belief these factors are not uniform across developing world Based on the empirical evidence from firms located in Malaysia India Nigeria Jamaica and Costa Rica the study concludes that firms cannot remain competitive without institutional support Since firms operate in different institutional and economic environment form of support varies from one country to another *Handbook on ICT in Developing Countries: 5G Perspective* Knud Erik Skouby, Idongesit William, Albert Gyamfi, 2017-05-16 The mobile communications market in developing countries is growing at a rapid rate This is evident in the rapid spread of mobile broadband cellular networks such as 3G 4G is also being deployed in developing countries around the world As the global communications market proceeds towards 5G it is evident that developing countries will not be left behind However there are challenges and barriers on the road ahead specific to developing countries To aid policy makers researchers and members of the academia make informed decision that will help the advancement of 5G this handbook provides an insight into the impact of existing mobile cellular networks in some developing countries Topics discussed in this handbook include Digital divide Policy outlook 5G and rural areas 5G readiness Telco Business models Telecom tower pricing Mobile application adoption **Information and Communication Technology for Development (ICT4D)** Richard Heeks, 2017-11-08 Mobile phones are close to ubiquitous in developing countries Internet and broadband access are becoming commonplace Information and communication technologies ICTs thus represent the fastest broadest and deepest technical change experienced in international development They now affect every development sector supporting the work of hundreds of millions of farmers and micro entrepreneurs creating millions of ICT based jobs assisting healthcare workers and teachers

facilitating political change impacting climate change but also linked with digital inequalities and harms with the pace of change continuously accelerating Information and Communication Technology for Development ICT4D provides the first dedicated textbook to examine and explain these emerging phenomena It will help students practitioners researchers and other readers understand the place of ICTs within development the ICT enabled changes already underway and the key issues and interventions that engage ICT4D practice and strategy The book has a three part structure The first three chapters set out the foundations of ICT4D the core relation between ICTs and development the underlying components needed for ICT4D to work and best practice in implementing ICT4D Five chapters then analyse key development goals economic growth poverty eradication social development good governance and environmental sustainability Each chapter assesses the goal related impact associated with ICTs and key lessons from real world cases The final chapter looks ahead to emerging technologies and emerging models of ICT enabled development The book uses extensive in text diagrams tables and boxed examples with chapter end discussion and assignment questions and further reading Supported by online activities video links session outlines and slides this textbook provides the basis for undergraduate postgraduate and online learning modules on ICT4D

Information and communication technologies for development and poverty reduction Maximo Torero, Joachim von Braun, 2006-01-01 The IT revolution made some glorious promises to the world's poor instant access to information and far flung markets political empowerment greater growth even the possibility that countries could leapfrog entire stages of development But when none of that happened in a hurry the hoopla gave way to concern that rather than closing the wealth gap IT was exacerbating it Yet for all the international debate and millions of words written about the digital divide very little systematic empirical research or studies over time have been done to confirm claims and counterclaims and to guide policymakers on how this technology actually affects the development of low income countries In this volume Maximo Torero and Joachim von Braun seek to address this omission with a collection of case studies exploring the relationship between information and communication technologies ICTs and development in Bangladesh China India Ghana Laos Peru and East Africa Their conclusion is that yes ICTs do have potential to serve and empower the poor by linking them to commercial and social networks cutting transaction costs and making the delivery of public goods like education and healthcare more efficient But these benefits can accrue only when the supporting infrastructure is in place and when ICT policies take into account not only questions of connectivity but also of capability how to help poor people use the new tools and of content what is relevant and in what form All three c's are critical Without coherent strategies and the right regulatory policies there is the very real likelihood that scarce resources will be misallocated and that ICT induced growth will remain elusive Contributors Abdul Bayes Arjun Bedi Romeo Bertolini Shyamal K Chowdhury Virgilio Galdo K Lal Francis A S T Matambalya Maja Micevska Dietrich Mueller Falcke Gi Soon Song Maximo Torero Joachim von Braun Wensheng Wang and Susanna Wolfe Gi Soon Song Maximo Torero Joachim von Braun Wensheng Wang Susanna Wolf
