## **Narrative Development:**

**Narrative Development** Michael Bamberg, 2012-11-12 Growing out of an International Society of the Study of Behavioral Development sponsored symposium this book discusses the basic assumptions that led the contributors to conduct research in the field of narrative development This collection gathers their research reflections and varying approaches to narrative and its development It illustrates each type of approach and highlights their respective motives The book presents some of the basic motivating assumptions of each approach and provides insight into what holds each set of assumptions together potentially transforming them into actions This book will serve as an excellent text for courses emphasizing multiple approaches to the study of narrative The editor has organized this volume in accordance with the six main points of the symposium Specification of the Domain how narratives are defined in terms of textual structures knowledge thereof interactive moves sociocultural conventions and the like The Individual's Involvement in the Developmental Process the relationship between some internal or external forces and the organism's own active participation in the developmental process The Course of Development if it is continuous or discontinuous whether it proceeds in an additive fashion or whether regressive phases occur and what changes at different points in the developmental process signify The Goal of Development the implicit notion of a telos a target or end point that needs to occur in the developmental process Mechanisms of Development the forces and or conditions that both instigate the developmental process and keep it moving toward its telos Methodology where and how to look in the establishment of a developmental framework This book is an indispensable text in the fields of narrative and or discourse linguistics language studies psychology and education in general *Narrative Development in a Multilingual Context* Ludo Verhoeven, Sven Strömqvist, 2001-12-31 In this volume the results of a number of empirical studies of the development of narrative construction within a multilingual context are presented and discussed It is explored what operating principles underlie the process of narrative production in L1 and L2 Developmental relations between form and function will be studied across a broad range of functional categories such as temporality perspective connectivity and narrative coherence Moreover a variety of language contact situations is considered with broad variation in the typological distances between the languages in order to enable cross linguistic comparison The analysis of learner data in various cross linguistic settings may thus offer new information on the role of the structural properties of unrelated languages on the process of narrative acquisition In the present volume an attempt is also made to find out how transfer from one language to the other is facilitated Finally the effects of input on narrative construction in children's first and second language are examined in several studies **Narrative Development in Adolescence** Kate C. McLean, Monisha Pasupathi, 2009-11-11 Monisha Pasupathi and Kate C McLean Where Have You Been Where Are You Going Narrative Identity in Adolescence How can we help youth move from childhood to adulthood in the most effective and positive way possible This is a question that parents educators researchers and policy makers engage with every day In this book we explore the

potential power of the stories that youth construct as one route for such movement Our emphasis is on how those stories serve to build a sense of identity for youth and how the kinds of stories youth tell are informed by their broader contexts from parents and friends to nationalities and history Identity development and in particular narrative identity development concerns the ways in which adolescents must integrate their past and present and articulate and anticipate their futures Erikson 1968 Viewed in this way identity development is not only unique to adolescence and emergent adulthood but also intimately linked to childhood and to adulthood The title for this chapter borrowed from the Joyce Carol Oates story highlights the precarious position of adolescence in relation to the construction of identity In this story the protagonist poised between childhood and adulthood navigates a series of encounters with relatively little awareness of either her childhood past or her potential adult futures Her choices are risky and her future at the end looks dark

### **Developing Narrative**

**Structure** Allyssa McCabe, Carole Peterson, 1991 Effective narration the telling of stories or recounting of personal experiences is an art requiring skills that appear crucial for children's language development and literacy acquisition This volume serves an important purpose because it pulls together the widely scattered literature in the field exploring the ways in which oral narrative structure develops in children and how it may be facilitated It presents new empirical studies on genres of narrative the role narrative structure plays in emergent literacy the relationship between narrative language and autobiographical memory and ways in which teachers and parents facilitate or hinder children's narrative development The empirical research presented here draws from diverse groups including Hispanic African American and Anglo American children from rural and urban America and Canada

### **Children's Play, Pretense, and Story** Susan Douglas, Lesley Stirling, 2015-12-21

At the heart of this volume is the recognition that children's engagement with play and story are intrinsically and intricately linked The contributing authors share a passionate interest in the development and well being of children in particular through their use of imagination and adaptation of the everyday into play and stories Following these principles the volume explores the connections between play story and pretense with regard to many cultural and contextual factors that influence the way these elements vary in children's lives In a departure from earlier collections on play and story the authors take a particular focus on normative as compared with atypical development This collection begins with an approach to understanding the developmental relationship between play and story which recognizes their similarities while acknowledging their differences Much of the collection addresses pretend play and story in children with autism spectrum disorder an understudied but important group for consideration as these dimensions of their lives and development have often been considered problematic The volume also includes sections on play and story in classroom settings and play and story across cultures including non English speaking environments such as Israel Romania China and Mexico It concludes with a discussion of how play differs across sociocultural and economic contexts making a unifying claim for the importance of play in children's lives but also calling for an understanding of what play means to very different groups of children

**Learning Foreign Languages in Primary School** María del Pilar García Mayo, 2017-06-16 This book presents research on the learning of foreign languages by children aged 6-12 years old in primary school settings. The collection provides a significant and important contribution to this often overlooked domain and aims to provide research-based evidence that might help to inform and develop pedagogical practice. Topics covered in the chapters include the influence of learner characteristics on word retrieval, explicit second language learning and language awareness, meaning construction, narrative oral development, conversational interaction, and how it relates to individual variables, first language use, feedback on written production, intercultural awareness, raising and feedback on diagnostic assessment. It will be of interest to undergraduate and graduate students, researchers, teachers, and stakeholders who are interested in research on how children learn a second language at primary school.

Narrative Development in Young Children Elena T. Levy, David McNeill, 2015-05-28 Presents an account of social and embodied threads of early narrative development of which gesture is an integral part. *Narrative Development in Educational Practice* Sylvia Velásquez Lawrence, 2023 Research shows storytelling or narrative skills are essential to the development of both human language and cognitive abilities. Starting as infants, children learn to talk and talk to learn through conversational exchanges and stories modeled by adults and practiced with peers. Assessments and the pressure to teach quantifiable academic skills are impacting curriculum choices and in the culture of a shared learning community, children are learning to be silent. This study looks at the storytelling experiences of center-based early childhood teachers as children and as adults. Individual interviews and narratives are explored and compared to discover connections and links between those experiences and their current teaching practice in supporting language literacy and learning in their classrooms. Results of this study can add to future research in teaching, training, influence, social justice pedagogy, and inform the design of learning environments for young children that spark discovery and wonder.
