Photographic Works:

Copyright Law in Photographic Works Faisal Alamri, 2025-07-25 This book presents an original theory of copyright authorship tailored for photographic works grounded in the concepts of categorical intention channelled selection and causation By addressing the unique dual nature of photography where mechanical processes intersect with creative choices it offers a fresh perspective on a longstanding legal challenge Through a critical examination of select case law with a focus on Anglo American law the book highlights the complexities and inconsistencies in the current copyright protection for photographs due to their dual nature which exhibits both mechanical and creative characteristics It argues for moving beyond the conventional one size fits all approach for copyright concepts in favour of adopting a tailored contextual approach that acknowledges the nature and characteristics of the category of work in question The book also alludes to emerging technologies such as artificial intelligence and machine learning models considering their implications for copyright and creative expression It also discusses how the history of copyright protection of photographic works may illuminate the path towards dealing with conflicts between copyright and perceived mechanical mediums of creative expression This book will be of interest to researchers in copyright law and intellectual property law especially those engaged with the legal treatment of mechanically produced creative works It offers valuable insights into the evolving relationship between law technology and authorship in the digital age
