## **Power And Politics In Globalization:**

**Power and Politics in Globalization** Howard H. Lentner, 2004-09-15 Challenging the conventional view that globalization embodies a new and inexorable process this book analyzes the political foundations and choices involved in contemporary arrangements in the world Rather than treating politics as contention for control over an unforeseeable future the book explains the background by which the world has arrived at its present state Thus the author presents a view that emphasizes continuity with the past while still acknowledging what is new in the present Invoking many examples throughout the author bolsters the theoretical analysis in an extended case study of Malaysia **International**

**Institutions and Power Politics** Anders Wivel, T.V. Paul, 2019-10-01 This book moves scholarly debates beyond the old question of whether or not international institutions matter in order to examine how they matter even in a world of power politics Power politics and international institutions are often studied as two separate domains but this is in need of rethinking because today most states strategically use institutions to further their interests Anders Wivel T V Paul and the international group of contributing authors update our understanding of how institutions are viewed among the major theoretical paradigms in international relations and they seek to bridge the divides Empirical chapters examine specific institutions in practice including the United Nations International Atomic Energy Agency and the European Union The book also points the way to future research International Institutions and Power Politics provides insights for both international relations theory and practical matters of foreign affairs and it will be essential reading for all international relations scholars and advanced students **Political Globalization** Morten Ougaard, 2003-11-25 Morten Ougaard provides a new and distinct theoretical perspective to the analysis of the globalization of politics The book analyzes global governance as the partial and uneven globalization of different aspects of statehood It focuses on the institutional infrastructure highlighting the role of the G7 OECD nexus in providing strategic leadership discusses an emerging global function of societal persistence or public goods governance and relations of power between social forces and finally it discusses American hegemonic leadership in the light of the dual power persistence perspective **Power, Politics, and Society** Betty A

Dobratz, 2015-10-14 Power Politics Society An Introduction to Political Sociology discusses how sociologists have organized the study of politics into conceptual frameworks and how each of these frameworks foster a sociological perspective on power and politics in society This includes discussing how these frameworks can be applied to understanding current issues and other real life aspects of politics The authors connect with students by engaging them in activities where they complete their own applications of theory hypothesis testing and forms of inquiry **Great Power Politics in the Fourth Industrial Revolution** Glenn Diesen, 2021-03-25 Why and how will the fourth industrial revolution impact great power politics Here Glenn Diesen utilizes a neoclassical approach to great power politics to assess how far the development of AI national and localized technological ecosystems and cyber warfare will affect great power politics in the next century The reliance of

modern economies on technological advances Diesen argues also compels states to intervene radically in economics and the lives of citizens as automation radically alters the economies of tomorrow A groundbreaking attempt to contextualize the fourth industrial revolution and analyse its effects on politics and international relations Global Politics Anthony G. McGrew,Paul Lewis,2013-05-02 This innovative new text is derived from a highly successful Open University course of the same title It takes as a dominant theme the contested issue of globalization the apparent intensification of global patterns of inter dependence and its implications for the autonomy of the modern nation state Following a conceptual introduction which critically examines the theoretical debates framing the study of world politics the work is structured around four key processes of globalization which the authors identify as being the central determinants of contemporary global politics These key processes are the global impact of great power relations the globalizing tendencies of technological innovation the existence of a global economy and the globalizing force of modernity Reflecting this structure the text is organized into four discrete sections Each section explores both theoretically and empirically one of the four processes of globalization Throughout particular attention is paid both to a critical evaluation of these globalizing processes as well as to their consequences for the sovereignty and autonomy of the modern nation state Moreover the authors combine a lucid treatment of theoretical debates with topical case study material to produce a text which is extremely accessible to undergraduate students studying international relations and politics and to those readers with little prior knowledge of world affairs

**Politics** John Baylis,Steve Smith,1997 An introductory text for students with no previous knowledge of contemporary world politics After an overview chapter on the concept of globalization and arguments for and against it four sections cover the historical background to contemporary world politics major theories structures and process of world politics and leading issues such as nuclear proliferation human rights global trade and finance and gender Chapters include case studies key points glossaries summaries and discussion questions Annotation copyrighted by Book News Inc Portland OR **Market Power Politics** Stephen E. Gent,Mark J.C. Crescenzi,2021-01-12 A new theory of market power politics that explains when and why states will delay cooperation or even fight wars in pursuit of this elusive goal How are the Iraqi invasion of Kuwait

the Russian incursions into Ukraine and Georgia and China's occupation of islands in the South China Sea related. All three of these important moments in modern history were driven by the motivation to capture market power. Whether it was oil for Iraq, natural gas for Russia, or rare earth elements for China, the goal isn't just the commodities themselves; it is the ability to determine their price on the global market.

In *Market Power Politics*, Stephen Gent and Mark Crescenzi develop a new theory of market power politics that explains when and why states will delay cooperation or even fight wars in pursuit of this elusive goal. Empirically examining case studies from different regions of the world, they explore how competition between states over market power can create disruptions in the global political economy and potentially lead to territorial aggression and war. They also provide clear policy recommendations urging international institutions to establish norms that reduce the potential for open conflict. Ultimately, *Market Power Politics* shows that nations' desire to increase their market power means that the push for territorial expansion will continue to shape the trajectory of world politics.

**Power, Powerlessness, and Globalization** Opoku Agyeman, 2014. This book is about imperialism-driven globalization, its historic impact on Africa, Latin America, and Asia, and over time the varied responses of the national political units and regional entities in these continents to the challenges of building countervailing power and laying foundations for independent development. Where genuine recovery and empowerment have emerged, this has been the result not only of the pursuit of dignified political and economic values that emphasize robust and sustained productivity geared toward uplifting the living standards and dignity of all the members of the national society, but also of the creation of indigenous institutions whose relations with the external world are defined by equality rather than dependence and subordination. Opoku Agyeman argues that dignification is the fundamentally necessary response to imperialism's inevitable afflictions of national racial humiliation. It is the most crucial ingredient in the complex of motivations that propel formerly weak nation-states and regional communities to rise up and defend the honor of their people. As Mao Zedong told the world in 1949, "Ours will no longer be a nation subject to insult and humiliation. We have stood up." This study argues emphatically that it is a country's or region's developed or developing capabilities, not its historic and continuing victimization or habitual dependence on charitable aid and other altruistic interventions from the international community that determines its success in escaping the scourge of powerlessness and underdevelopment. It further maintains that a people who have been brought low through brutal dehumanizing imperialism cannot bypass the need for redemptive empowerment if they wish to regain honor and a proper place in the world.

Finally, it takes issue with Joseph Stiglitz, Jeffrey Sachs, and others like them whose moralistic critiques of the rapacity of imperialistic globalization carry the unfortunate implication that it is possible for a fair and just world social order to come out of incremental reforms of philanthropically motivated developed powerful countries in the structure and operations of global capitalism.

explores how multinational enterprises morphed into world political organisations with global reach and power but without the corresponding responsibilities In illuminating how the concentration of property rights within corporations has led to the rejection of democracy as an ineffective system of government and to the rise in inequality Rob offers a clear pathway to a fairer and more sustainable power system

**World Politics in Translation** Tobias Berger, Alejandro Esguerra, 2017-09-14

Virtually all pertinent issues that the world faces today such as nuclear proliferation climate change the spread of infectious disease and economic globalization imply objects that move However surprisingly little is known about how the actual objects of world politics are constituted how they move and how they change while moving This book addresses these questions through the concept of translation the simultaneous processes of object constitution transportation and transformation Translations occur when specific forms of knowledge about the environment international human rights norms or water policies consolidate travel and change World Politics in Translation conceptualizes translation for International Relations by drawing on theoretical insights from Literary Studies Postcolonial Scholarship and Science and Technology Studies The individual chapters explore how the concept of translation opens new perspectives on development cooperation the diffusion of norms and organizational templates the performance in and of international organizations or the politics of international security governance This book constitutes an excellent resource for students and scholars in the fields of Politics International Relations Social Anthropology Development Studies and Sociology Combining empirically grounded case studies with methodological reflection and theoretical innovation the book provides a powerful and productive introduction to world politics in translation
