Manfred Mohr Manfred Mohr, Frieder Nake, 2001 *When the Machine Made Art* Grant D. Taylor, 2014-04-10

Considering how culturally indispensable digital technology is today it is ironic that computer generated art was attacked when it burst onto the scene in the early 1960s In fact no other twentieth century art form has elicited such a negative and hostile response *When the Machine Made Art* examines the cultural and critical response to computer art or what we refer to today as digital art Tracing the heated debates between art and science the societal anxiety over nascent computer technology and the myths and philosophies surrounding digital computation Taylor is able to identify the destabilizing forces that shape and eventually fragment the computer art movement **Manfred Mohr** Manfred Mohr, 2007 **The Algorithm**

of Manfred Mohr Margit Rosen, 2019-05 A forerunner of digital art New York based German artist Manfred Mohr born 1938 exhibited his computer generated drawings as early as 1971 Selected essays letters and interviews from 1963 79 provide insight into his early works and the beginnings of digital art **Digital Art, Aesthetic Creation** Paul Crowther, 2018-10-10

Is art created with computers really art This book answers yes Computers can generate visual art with unique aesthetic effects based on innovations in computer technology and a Postmodern naturalization of technology wherein technology becomes something we live in as well as use The present study establishes these claims by looking at digital art s historical emergence from the 1960s to the start of the present century Paul Crowther using a philosophical approach to art history considers the first steps towards digital graphics their development in terms of three dimensional abstraction and figuration and then the complexities of their interactive formats **From Fingers to Digits** Margaret A. Boden, Ernest A.

Edmonds, 2019-07-16 Essays on computer art and its relation to more traditional art by a pioneering practitioner and a philosopher of artificial intelligence In *From Fingers to Digits* a practicing artist and a philosopher examine computer art and how it has been both accepted and rejected by the mainstream art world In a series of essays Margaret Boden a philosopher and expert in artificial intelligence and Ernest Edmonds a pioneering and internationally recognized computer artist grapple with key questions about the aesthetics of computer art Other modern technologies photography and film have been accepted by critics as ways of doing art Does the use of computers compromise computer art s aesthetic credentials in ways that the use of cameras does not Is writing a computer program equivalent to painting with a brush Essays by Boden identify types of computer art describe the study of creativity in AI and explore links between computer art and traditional views in philosophical aesthetics Essays by Edmonds offer a practitioner s perspective considering among other things how the experience of creating computer art compares to that of traditional art making Finally the book presents interviews in which contemporary computer artists offer a wide range of comments on the issues raised in Boden s and Edmonds s essays

Digital Image Systems Claus Gunti, 2020-01-07 In *Digital Image Systems* Claus Gunti examines the antagonizing reactions to digital technologies in photography While Thomas Ruff Andreas Gursky and J rg Sasse have gradually adopted digital

imaging tools in the early 1990s other photographers from the Düsseldorf School have remained faithful to film based technologies By evaluating the aesthetic and discursive preconditions of this situation and by extensively analyzing the digital work of these three photographers this book shows that the digital turn in photography was anticipated by the conceptualization of images within systems and thus offers new perspectives for understanding the digital revolution
